Hello Amber,

GCC submitted a 5-day notification for the additional sample request for the CKD area. GCC will be sampling on Friday, April 12, 2024.

Below you will find response to the first two items of the NMED response letter.
1. The TCLP results indicates the sample identifier is" GCC Tijeras Coal". Please specify if these results are for the off-spec coal or the regularly used coal? If these results are for the standard coal, NMED requests a sample of the off-spec coal be collected and analyzed for TCLP. The sample results submitted with the NOI are for off-spec coal.
2. The SPLP results indicates the sample identifier is "Coal". Please specify if these results are for the off-spec coal or the regularly used coal? If these results are for the standard coal, NMED requests a sample of the off-spec coal be collected and analyzed for SPLP. The sample results submitted with the NOI are for off-spec coal.

If there are any other questions, please let me know.
V/r
Samantha
