Re: Permit Modification
Permit No. 7HU2013001, Section 4 - Mesa Verde Mine
Request for Release of FA on Reclaimed Acres

Mr. Director,

This letter is our formal request for the release of FA on 5.9 reclaimed acres at our Section 4 Mine, pursuant to 19.10.12.1210 NMAC. The subject acreage is delineated on the attached map as the shaded green polygon. The newly reclaimed area, shaded in green, is ready for inspection at the convenience of MMD and the other agencies involved.

Reclamation Work

The subject area has been filled and re-contoured to slopes approximating the surrounding terrain. Horizontal deep ripping was done for erosion control.

Seeding

Seeding will be completed using a broadcast method as we have done in the past, at a rate of ~19 lbs./acre.

Sincerely,

Jeff Warren
