Mining and Minerals Division
1220 South St. Francis Drive
Santa Fe, NM 87505

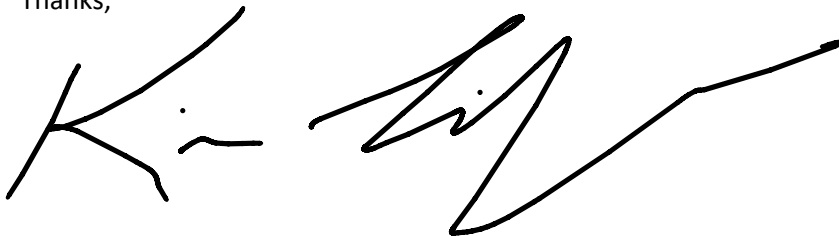

Dear Mr. Ennis,

This letter is intended to serve as a request for modifications to the Brie I Mine, permit number MK039MN. Miocene would like to request the inclusion of all of Section 33 and Section 29, Township 20N, Range 6W within the Brie I permit area. Miocene is currently qualified to access these locations via agreements with the surface and mineral owners. These areas are requested for addition to the permit in anticipation of future production.

Miocene would also request the release of approximately 4.85 acres of reclaimed disturbance within Section 3, Township 19N, Range 6W of the Brie I permit. Please see the attached map for an illustration of the reclaimed area(see Attachment 1). The reclamation has been backfilled with overburden, topsoil has been restored, contouring has occurred to meet a natural grade, and seeding has taken place with a regionally appropriate mixture(see Attachment 2).

Please let me know if you have any questions regarding the requests above.

Thanks,

A handwritten signature in black ink, appearing to read "Kris Lindgren". The signature is stylized and written in a cursive-like font.

Kris Lindgren
