David (DJ) Ennis  
P.G. Permit Lead  
Mining Act Reclamation Program  
Energy, Minerals and Natural Resources Department

Dear Mr. Ennis,

In response to your letter dated June 16, 2022. We are enclosing several attachments for your review.

In response to item 2 please see bid/cost proposals for Humate Plant Removal. The plant was built to be moved in several components. Hopper, conveyor, screen, and container. It was brought in on two semis and erected in 4 working days. See enclosed pictures.

In response to item 3. We will not disturb any additional new land in the next 5 years. The proposed direction for mining will be from the west to east as we are currently mining. The placement of overburden or waste piles will be placed in the area previously mined.

Thank you for your assistance on this Permit Renewal Application.

Sincerely,

*Dennis Y. Jones*

Dennis Y. Jones, President
