RE: Request for Comments on Revision 23-1 to Continental Mine and Mill – Update to Closure/Closeout Plan, Permit No. GR002RE, Freeport-McMoRan Chino Mines Company

Dear Mr. Navarro:

The New Mexico Mining and Minerals Division (MMD) received an application from Freeport-McMoRan Chino Mines Company (Chino) dated July 2023 requesting a revision to Permit No. GR002RE, for the Continental Mine Closure/Closeout Plan (CCP) Update (Application). Chino provided proof of public notification of the application to MMD in a letter dated October 30, 2023, and MMD has determined the application to be administratively complete on November 6, 2023. The Application (assigned by MMD as Revision 23-1) for the Continental Mine permit proposes an updated CCP similar to the 2014 CCP with some differences, not limited to the following:

1. The 2023 Updated CCP is based on the constructed facilities as of 2023 and end of year 2026 for the Cobre Haul Road, Hanover Mountain Mine, and South Waste Rock Disposal Facility (SWRDF). In the 2014 CCP, the Cobre Haul Road and Hanover Mountain Mine were conceptual plans.
2. The 2023 Updated CCP's Reclamation Cost Estimate is based on unit costs in 2023 dollars for end of year 2026, as the greatest anticipated reclamation cost or highest liability year out of years 2023 to 2027.
3. The 2023 Updated CCP contemplates use of Cobre Haul Road and Santa Rita Mine's Upper South Stockpile as sources for cover material. At the same time, an ongoing 2022 test plot study is evaluating other cover material sources.

RE: Request for Comments on Revision 23-1 to Continental Mine Updated CCP, Permit
No. GR002RE, Freeport-McMoRan Chino Mining Company
