**Biaxial Geogrids that are acceptable, if you find others that meet the specs please let us know:**

**SYNTEEN SF11  
BASE COURSE REINFORCEMENT  
SUBGRADE IMPROVEMENT BIAXIAL GEOGRID**

**SF11** is composed of high molecular weight, high tenacity multifilament polyester yarns that are woven into a stable network placed under tension. The high strength polyester yarns are coated with a polymer coating. SF Geogrids are inert to biological degradation and are resistant to naturally encountered chemicals, alkalis and acids.

Standard Roll Size: 12' x 150'. STF can produce master roll lengths as well.
