# Δ\_΄

# PUBLIC PROJECT REVOLVING LOAN FUND NEW MEXICO FINANCE AUTHORITY

#### **PROGRAM PURPOSE:**

The NMFA's flagship program is a unique revolving loan fund known as the Public Project Revolving Fund (PPRF). The PPRF funds infrastructure and capital equipment projects with low-cost and low-interest rate loans to local government entities.

| AT A GLA                                                                | NCE                                                                                |

| Total program funds available: The NMFA bond                            | l funds the PPRF program and has an                                                |
| estimated capacity of \$1.2 billion.                                    |                                                                                    |
| There is no maximum or minimum amout that m                             | nay be awarded.                                                                    |
| Eligibility                                                             | Type of Aid Grant Cooperative Agreement Service Contract Loan Technical Assistance |
| Deadline to Apply  Applications are accepted throughout the year at the | entity's convenience.                                                              |

#### **Eligibility**

All borrowers must be specifically authorized by statute. Eligible entities include: agencies or institutions of the state; counties; municipalities; school districts; l and grant corporations; intercommunity water or natural gas supply associations or corporations; special districts; community water associations; Native American nations; and ildian nations, tribes or pueblos located wholly or partially in New Mexico; and consortia of tribes, pueblos, or nations.

#### **Special Conditions**

All projects financed through this program require legislative authorization which under certain circumstances can be obtained after the loan has been made.

#### Use of Funds

Funds may be used for capital equipment and infrastructure projects with a useful life of 3 years or more. Examples: Fire Protection; Law Enforcement and Protection; Computer and Data Processing; Street and Road Construction and Maintenance; Emergency Medical Equipment; Solid Waste Collection, Transfer, and Disposal; Radio and Telecommunication; Land; Buildings; Water Rights; Water, Sewer and Waste Disposal Systems; Roads; Airports; Municipal Utilities; and Parking Facilities.

#### **Funding Availability**

#### **Funding Potential**

Funds are available throughout the year.

# Range of Awards

-Disadvantaged Entity Funding Feature

This feature helps qualified entities stretch their dollars even further. A public entity can qualify for lower interest rate loans based on a comparison of its Median Household Income (MHI) to that of the State as a whole. Up to \$200,000 per fiscal year is available at a 3 percent interest rate to public entities that have an MHI of less than 90 percent, but greater than 75 percent of the State MHI. For entities with an MHI of 75 percent or less of the State MHI, up to \$200,000 per fiscal year is available at an interest rate of 0 percent. Individual loans are limited to \$75,000 per equipment financing and \$200,000 per infrastructure financing. Funds needed in excess of this cap would be available at the NMFA's regular AAA-insured tax-exempt rates. Funds are distributed on a first-come, first-served basis.

-Just-In-Time Equipment Loan Program (Interim Loans)

The Just-In-Time Equipment Finance Program provides low-cost financing for all types of capital equipment at below-market interest rates. Unlike standard Public Project Revolving Fund (PPRF) loans, the Just-in-Time program loans do not require prior legislative authorization and are temporary in nature. The program is designed for situations when a locality needs to acquire equipment between the legislative sessions. Like standard PPRF loans, entities using the Just-In-Time loan may qualify for Disadvantaged Entity Funding and Costs of Issuance Assistance. These interim loans are interest only and must be replaced with permanent financing from the NMFA within two years.

A Just-In-Time equipment loan cannot exceed \$750,000 per project. The NMFA can provide low-interest rate financing for capital equipment including the acquisition and construction of pre-fabricated steel structures for use as fire stations.

In addition, the NMFA acts solely as a lender and does not limit the freedom of the locality to buy what it wants. Equipment purchases must adhere to state procurement code and other state statutes as required. In cases where fire protection funds are utilized as a repayment source, the State Fire Marshal must approve all aspects of the project including any loan agreement with the NMFA.

The NMFA staff evaluates an applicant's fiscal capacity and creditworthiness and recommends project approvals to its Board of Directors based upon entity's ability to repay loan obligations and comply with various readiness to proceed criteria. Interim equipment loans are approved as needed throughout the year.

-Expedited Loans for Emergency or Urgent Economic Development Projects

In 2000, the Legislature authorized the NMFA to make a limited number of loans from the PPRF to qualified local government entities for "emergency" public projects. In order for a project to qualify as an "emergency public project," the project has to meet the following definitions: being an unforeseen occurrence or circumstance threatening public health, safety, or welfare; requiring the immediate expenditure of money; and not being within the financial resources of the applicant.

These projects can receive permanent financing from the PPRF without legislative authorization, which is required of all other loans from the PPRF. The NMFA is limited to \$3 million in emergency loans per fiscal year, and individual loans for emergency projects may not exceed \$500,000.

In 2003, the Legislature gave the NMFA the ability to aid economic development projects between legislative sessions by providing critical infrastructure financing without legislative authorization. For vital projects, certified as urgent by the Secretary of Economic Development, NMFA may make PPRF loans of up to \$2 million to qualified entities for qualified projects.

These abilities allow the NMFA to be more responsive to the needs of communities that encounter unforeseen needs for vital public projects between legislative sessions..

#### **Funding Cycle - Duration**

The NMFA, based on NMFA Board approval provides loans with a term concurrent with IRS guidelines as to what the usefule life of the project is not to exceed 30 years.

#### Source of Funds

The NMFA receives capitalization grants from the Environmental Protection Agency as well as a 20 percent State match which funds the DWRLF program.

#### **Application Process**

#### Deadline

Applications are accepted throughout the year at the entities convience.

# How to Apply

Applications can either be accessed through the NMFA web site at nmfa.net or an application can mailed directly to the entity.

#### **Selection Criteria & Decision Authority**

NMFA staff will work with an entity to determine its specific eligibility under program rules and its ability to repay the loan and will then present it to the NMFA Board for approval and will then work with the entity to move towards closing of the loan.

#### Authorization

6-21A-1

#### Related Programs

The NMFA also administers the Public Project Revolving Loan fund which can be used to fund capital projects with a useful life of three years or more. In addition the NMFA also administers the Water and Wastewater Grant Fund which requires Legislative appropriations but can be used for water and wastewater projects.

#### Eligibility

Incorporated municipalities and counties are eligible.

# **Special Conditions**

Infrastructure improvement must be directly related to industrial or economic development. Repayment terms are negotiable but there must be a formal loan agreement as specified by the Department.

#### Use of Funds

Loan funds are intended to improve economic conditions, encourage economic diversification, create or retain jobs, and leverage additional resources. They can be used for the improvement of community infrastructure, acquisition of real property, construction, reconstruction, rehabilitation or installation of public facilities, site improvements and utilities, commercial or industrial buildings or structures and other commercial or industrial real property improvements.

#### **Funding Availability**

#### **Funding Potential**

The revolving loan fund was established in FY 72 with a \$1 million appropriation.

#### Range of Awards

Loans are limited to \$25,000 per applicant.

# **Funding Cycle - Duration**

There is continuous cycle of funding applications. Loan payment schedules vary.

#### **Source of Funds**

State and local government.

# **Application Process**

#### Deadline

None

# How to Apply

Local governments request forms and technical assistance from the Economic Development Department staff. The local government must submit local resolutions and ordinance supporting the project and authorizing repayment of the loan.

# Selection Criteria & Decision Authority

Applications are reviewed by the staff of the Economic Development Department and commented on by the Local Government Division of DFA and the Attorney General's Office. Final decisions are made by the Economic Development Commission within 60 to 90 days of submittal.

Criteria for selection include:

- a) number of jobs to be created, retained or enhanced for local residents;
- b) the potential of attracting subsequent financial investments into the community;
- c) ability to leverage other funds for the project; and
- d) likelihood of successful implementation

#### **Authorization**

Sections 21-19-10 & 11 NMSA 1978.

#### **Related Programs**

Small Cities Community Development Block Grant Program, administered by the Local Government Division DFA.

# **Eligibility**

As defined under the federal Safe Drinking Water Act, funds from the DWRLF are available to public community water systems. A public community water system is a community water system, either privately or publicly owned, that provides water for human consumption to at least 15 service connections or regularly serves at least 25 individuals.

To be considered for funding, projects must be ranked on the NMED Comprehensive Priority List and be evaluated through the NMED Capacity Assessment process. The principal elements of the priority list ranking system are protection of public health compliance, environmental criteria, affordability criteria; and capacity development criteria.

#### **Special Conditions**

All drinking water projects are subject to an environmental review process as well as formal engineering of the project. The NMFA has the ability under certain circumstances to cover the cost of the preparation of these documents and can work with the entity at the beginning of the process to determine the entity's possible eligibility for this subsidy.

#### Use of Funds

Use of DWRLF proceeds are intended to improve and protect drinking water quality and public health through construction and rehabilitation of necessary drinking water facilities. As such, proceeds can be used for construction and all professional costs associated with the project. DWRLF proceeds can not be used primarily for growth, the purchase of water rights, mainly for fire protection or for open reservoirs.

#### **Funding Availability**

#### **Funding Potential**

The NMFA receives approximately \$8 million a year through Environmental Protection Agency capitalization grants, but the NMFA also has other funds available to fully fund an entities needs.

#### Range of Awards

A single applicant can receive no more than 20 percent of the total DWRLF capitalization, or 50 percent of their total project funding over \$2 million, whichever is smaller. Projects requiring funding above the cap amount will be offered a loan from the NMFA's Public Project Revolving Loan Fund Program. The cap on loan amounts from the DWRLF may be removed if qualified projects are not ready to proceed in a timely manner.

The following process will apply to the portion of the DWRLF loan used for disadvantaged communities. Up to 30 percent of the DWRLF fund may be used to provide lower-interest loans and other special financing terms to disadvantaged communities. No single applicant may receive more then 10 percent of this portion earmarked for disadvantaged communities. Any additional funds required to complete the project will be financed at terms offered to non-disadvantaged communities. This limitation may be waived if there is not sufficient demand among disadvantaged communities. If classified in the first group, interest rates on loans will be at 0 percent for a maximum loan term of 20 years. If classified in the second group, in order to bring the afford ability ratio down to the maximum, the NMFA and NMED will provide, to the extent available and necessary, the following assistance, in this order; 1) provision of planning, design and engineering services free of charge by the NMED from set-a-sides to reduce total project cost; 2) extension of the amortization period on the 0 percent disadvantaged community loan to a maximum of 30 years. 3) Forgiveness of principal payments on the disadvantaged community portion of the loan; and 4) Assistance in obtaining grants from other sources.

If these cost reductions by NMFA and NMED fail to bring the affordability ratio down to 0.15, the project will be passed over until sufficient additional funding can be secured. This 0.15 cap may be waived at the request of the applicant. The restriction of any applicant to 10 percent of the funds available to disadvantaged communities may be waived if there is not sufficient ready demand.

#### Funding Cycle - Duration

The NMFA, based on NMFA Board approval provides loans with a construction period of not more than three years during which time the entity will only pay interest on those amounts draw down. At the completion of the project and a final loan amount is known,

A-

the loan will convert to a permanent financing schedule at which time the borrower will be responsible for the repayment of the principal of the loan.

#### **Source of Funds**

The NMFA receives capitalization grants from the Environmental Protection Agency as well as a 20 percent State match which funds the DWRLF program.

#### **Application Process**

#### Deadline

Applications are accepted throughout the year at the entities convience.

#### How to Apply

Applications can either be accessed at www.nmfa.net or an application can mailed directly to the entity.

#### **Selection Criteria & Decision Authority**

NMFA staff will work with an entity to determine its specific eligibility under program rules and its ability to repay the loan and will then present it to the NMFA Board for approval and will then work with the entity to move towards closing of the loan.

#### Authorization

6-21A-1

#### **Related Programs**

The NMFA also administers the Public Project Revolving Loan fund which can be used to fund capital projects with a useful life of three years or more. In addition the NMFA also administers the Water and Wastewater Grant Fund which requires Legislative appropriations but can be used for water and wastewater projects.

# RURAL INFRASTRUCTURE PROGRAM ENVIRONMENT DEPARTMENT

#### **PROGRAM PURPOSE:**

To correct inadequate water supply facilities operated by local authorities through financial assistance for the construction or modification of those facilities.

| AT A GLA                                                                                                                                                  | ANCE                                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Fund Availability Total program funding available - \$11 million. Maximum amount that will be awarded - \$500, Minimum amount that will be awarded - N/A. | 000 annually.                                                                                 |
| Eligibility                                                                                                                                               | Type of Aid  ☐ Grant ☐ Cooperative Agreement ☐ Service Contract ☐ Loan ☐ Technical Assistance |
| Deadline to Apply Open application cycle.                                                                                                                 |                                                                                               |

#### **Eligibility**

Any incorporated municipality, county, mutual domestic association, public water cooperative association, or sanitation district whose water supply facility serves a population of less than 10,000 persons. Public bodies serving a population less than 3,000 are eligible for zero interest loans or supplementary grants if the average user cost required to repay the normal loan would be excessive.

#### **Special Conditions**

To receive 0 percent interest loans, or supplementary grants when available, the locality must meet hardship requirements including a population of less than 3,000 persons. The supplement can be used only to reduce the principal and interest portion of the average residential user costs which would otherwise exceed \$18.00 per month. Interest rates vary according to need. Federal grant and loan program requirements do not apply.

#### Use of Funds

Grant funds are subject to legislative appropriation. Loan funds can be used for up to 100 percent of the costs of construction or modification of water supply and wastewater facilities including, but not restricted to, the costs of engineering feasibility reports, design, construction inspection, archaeological surveys, contracted construction, and

special engineering services. Only loan funds can be used for land and water rights, easements, and legal fees. Administrative costs are not eligible.

# **Funding Availability**

# **Funding Potential**

Total available funds vary with legislative appropriations approximately \$1 million. The standard interest rate is 3 percent or below. In certain years grants are not available.

# Range of Awards

The maximum loan amount is \$500,000. Up to 100 percent of the costs can be financed. The normal interest rate is 3 percent but may be as low as 0 percent in some cases.

# **Funding Cycle - Duration**

The repayment period is 20 years and the schedule for annual payments is amortized upon completion of construction. Allocations begin with the state fiscal year and are dispersed on a monthly cost-reimbursement basis.

#### Source of Funds

The source of the RIP program funds includes an initial state legislative appropriation in 1995, principal and interest payments on current loans, and interest earnings on the fund.

#### **Application Process**

#### Deadline

Open application cycle.

# How to Apply

Application forms with instructions are available on the Department website at www.nmenv.state.nm.us/cpb/cpbtop.html or may be requested from the Department at any time. Department staff are available to assist in the application process.

# **Selection Criteria & Decision Authority**

Applications are included on the priority list according to need as determined by the condition of the system, the adequacy of the system to serve the population, and the size of the jurisdiction. Priority is given to the smaller jurisdictions. Applicants must be placed on the priority list; show a willingness and ability to repay the loan; be capable of maintaining a replacement fund and the facility; and ready to proceed with a project. Applications can be processed and funded within four to six weeks, depending on the availability of funds.

#### Authorization

New Mexico Rural Infrastructure Act, Section 75-1-1 et seq., NMSA 1978; and administered according to regulations of the Environmental Improvement Board, Part VI and VIII.

#### **Related Programs**

Small Cities Community Development Block Grant Program administered by DFA; Community Development Revolving Loan Fund - Economic Development Department; New Mexico Finance Authority Programs; and the programs of the U.S. Farmer's Home Administration, Department of Agriculture.

# WATER/WASTEWATER GRANT FUND PROGAM NEW MEXICO FINANCE AUTHORITY

#### PROGRAM PURPOSE:

The goal of the Water/Wastewater Grant Fund (W/WWGF) program is to award grants for water and wasterwater projects to qualified entities. It is used in combination with the NMFA's low-cost interest rate loan with grants for water and wastewater projects. For example, if a qualifying entity is unable to finance a project with 100 percent loan funds, the entity may apply to the NMFA to receive a partial grant from the W/WWGF and a partial loan from the PPRF. A local match may be required for the grant and is determined by a sliding scale based on the applicant's financial ability to repay a portion of the project from local resources.

| AT A GLA                                                                                                                                                                                        | ANCE                                                                                          |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| Fund Availability                                                                                                                                                                               |                                                                                               |
| Approximate total funds: \$5 million in bonds.                                                                                                                                                  |                                                                                               |
| Funds amounts awarded range between \$12,500                                                                                                                                                    | 0 and \$400,000.                                                                              |
| Eligibility  ☐ Counties ☐ Municipalities ☐ Special Districts ☐ Indian Tribes & Pueblos ☐ Other Local Governmental Units ☐ Non-profit 501(c)3 ☐ Individual ☐ Private Business ☐ School Districts | Type of Aid  ☐ Grant ☐ Cooperative Agreement ☐ Service Contract ☐ Loan ☐ Technical Assistance |
| Deadline to Apply Applications are accepted and processed throughou after projects have been approved by the Legislature                                                                        |                                                                                               |

#### **Eligibility**

The NMFA is authorized by statutes to offer assistance to any agency or institution of the State, any county, municipality, public school district, land grant corporation, intercommunity water or natural gas supply association or corporation, special district, community water association, Indian nation, tribe or pueblo located wholly or partially in New Mexico, including a political subdivision or a wholly-owned enterprise of an Indian nation, tribe or pueblo.

#### **Special Conditions**

Since the total amount of all request for grants from the W/WWGF usually exceeds the amount of funding available in a given funding cycle, not every project authorized will receive grant funds. The amount that a particular project receives depends upon several factors, including the portion of the project that an entity can fund from its own resources, the local median household income (MHI), the local water and/or wastewater rates and a complete funding application.

#### **Use of Funds**

Eligible expenditures include: construction-related activities such as planning and design, actual construction of structures and associated equipment costs; and, infrastructure-related expenses including facility or land acquisition as well as the cost of utility installations. Operational and/or administrative costs are not eligible.

#### Funding Availability

# **Funding Potential**

There is a \$400,000 limit on the maximum amount of grant funding available for any one project and a maximum of \$400,000 in grant funding per entity per fiscal year. The 2000 Legislature authorized 37 potential grant projects totaling approximately \$13.9 million. As of January 31, 2001, the NMFA had approved 22 grant projects totaling over \$4.5 million.

#### Range of Awards

From \$12,500 to \$400,000

#### **Funding Cycle - Duration**

Varies throughout the year depending upon availability of funds.

#### Source of Funds

In 2000, the Legislature authorized the issuance of up to \$5 million in bonds to capitalize the W/WWGF. The funds for the program are derived from the net proceeds of the sale of bonds authorized by law and payable from GGRT Revenue. The grant fund is also authorized to receive money appropriated by the Legislature as well as other public or private money dedicated to the fund. The grant fund is created outside of the PPRF and will not reduce the capacity of the NMFA to make loans from the PPRF.

#### **Application Process**

#### Deadline

Applications are accepted and processed throughout the year. Final funding may be completed after projects have been approved by the Legislature.

# How to Apply

Contact the NMFA to initiate project review. Depending upon the nature of the project, potential applicants will be mailed an application and related forms or directed to download the appropriate application and related forms from the NMFA website.

#### **Selection Criteria & Decision Authority**

The NMFA must exercise sound judgement in evaluating the applicant's fiscal responsibility and creditworthiness. After staff evaluation at various stages, completed applications will be referred to the Board's Finance/Loan Committee, which will recommend action to the full NMFA Board. Each approved project must be submitted to the NMFA Legislative Oversight Committee and to the full Legislature for final approval. Final funding awards are also subject to due diligence with applicable state statutes and regulations.

#### Authorization

Section 6-21-1 to 6-21-30 NMSA 1978, the New Mexico Finance Authority Act.

# **Related Programs**

Public Project Revolving Loan Fund (PPRF); Drinking Water Revolving Loan Fund (DWRLF)

**RE: MADRID COAL WASTE CHARACTERIZATION** 

### 1.0 INTRODUCTION

The Madrid Mining Landscape project, supported by the New Mexico Abandoned Mine Lands (AML) program, is examining potential reclamation options to mitigate mining-related impacts including coal wastes in and around the Village of Madrid. Golder Associates Inc. (Golder) has been working with Dekker\Perich\Sabatini (DPS) and Karpoff and Associates (Karpoff) to engage the residents of Madrid in a consensus planning process to develop a community-based plan to address these mining Impacts and coal waste materials. Through a community outreach that included individual interviews and community meetings with residents and stakeholders, the community planning process has focused on reclamation projects that would address the degraded watershed and the community's stormwater infrastructure.

During the planning team's interactions with the residents, several people expressed concerns regarding the potential for mining wastes to contaminate water resources, particularly those related to impacts from elevated metal concentrations. Sampling and laboratory testing of gob materials and native soils had been conducted previously by the AML Program in 2000. Samples were collected at various locations on gob piles near Madrid, but their precise locations were not documented. The extractable metal concentrations from coal waste samples using the Synthetic Precipitation Leach Procedure (SPLP) [EPA method 1312] indicated a few metals with concentrations exceeding State water quality standards

With the stormwater focus of the Madrid Mining Landscape community plan, AML tasked Golder to conduct additional sampling and analysis of the coal waste piles to expand on the understanding of their character relative to the potential to impact surface water quality. Golder conducted this task with the understanding that surface water quality data were unavailable for the Madrid watershed and there was no indication of surface water quality degradation under current conditions.

### 2.0 **METHODS**

Sampling fieldwork associated with this investigation took place on August 27, 2010. Sample locations were selected to collect representative grab samples of the various coal waste materials and native soils in the vicinity of Madrid. In all, ten waste rock and native soil samples were collected from the near surface materials (0-6 inches). Representative samples (<3 inches size fraction) of the waste materials E-2

were collected in 1-gallon, air-tight bags, and submitted to Energy Laboratories, Inc. in Billings, Montana for leachate extraction and metals analyses. The metals analyzed included Al, As, Ba, B, Cd, Cr, Co, Cu, Fe, Pb, Mn, Hg, Mo, Ni, Se, Ag, U, V and Zn. At the laboratory, the samples were also analyzed for saturated paste pH and electrical conductivity (EC) and grain size. Acid base accounting (ABA) was analyzed for samples having a pH less than 5.

### 3.0 RESULTS AND CONCLUSIONS

Eight coal wastes samples were collected across the Madrid watershed, including slag (3), gob (4), and gob mixed with other sediments (1). Two additional samples were collected from the upper six inches of native soils. Figure 1 illustrates the distribution of the sample locations in the Madrid watershed. In general, coal gob is present primarily in upslope positions while slag is the dominate coal waste in the valley, particularly along the old railroad bed. Photos of sample locations and associated surface conditions are provided in Attachment 1.

Table 1 provides the chemical and physical results for this investigation and laboratory reports are provided in Attachment 2. Gob materials range from coarse- to fine-textured are non to very slightly saline with pH ranging from extremely acid (pH=4.4) to slightly alkaline (pH=7.4). Slag materials are also non-to very slightly saline very strongly acid (pH=4.7) to slightly alkaline (pH=7.6) and range from coarse- to moderately fine-textured. Native soils are moderately fine-textured and non saline with neutral to slightly alkaline pH values. Two samples had slightly negative ABA values based on pyritic and residual sulfur content and thus could locally generate acidic soil conditions. Relative to sample analyses from 2000, the 2010 coal waste materials are generally more alkaline, less saline and have lower ABA values.

Metal concentrations in SPLP extracts were compared to the New Mexico Water Quality Control Commission standards for groundwater, irrigation and livestock (Table 2). Groundwater and irrigation standards were used as a benchmark for metals that are not regulated under the livestock standards. Metal concentrations of SPLP extracts showed gob and native soil samples with generally elevated aluminum concentrations relative to livestock surface water quality standards (Table 2). Extractable iron concentrations in the majority of samples, including native soils, were elevated relative to groundwater standards. For both iron and aluminum concentrations in the native soil samples had the highest extractable concentrations. Additionally, one native soil sample had elevated extractable boron. A few samples collected in 2000 had similar extractable boron, iron and aluminum concentrations as well as elevated extractable concentrations of manganese and barium relative to groundwater standards. In general, the 2010 samples with low pH and high EC, had low extractable metal concentrations.

The SPLP results presented here are qualified because there is uncertainty whether they accurately predict pore water concentrations and are indicative of potential surface water quality. While the SPLP method was designed to mimic the action of slightly acidic rainfall (pH 5) periodically leaching through soil, it is difficult to predict the actual mobility of constituents from the results. Further, there are no

E-3

specific regulatory criteria that dictate the interpretation of SPLP results relative to potential water quality impacts. That said, comparing the SPLP directly to water quality limits has been found to be conservative in most situations.

In summary, native soils have elevated extractable metal concentrations in SPLP extracts suggesting that surface waters in the Madrid watershed may naturally have higher concentrations of certain metals compared to water quality standards. Extractable metals concentrations from coal wastes were generally lower compared to those from native soils, thus water quality impacts from coal wastes are expected to be less than from undisturbed soils. Further, low pH and high EC coal wastes (pH < 3.5; EC > 4.0) were not observed, though a few samples from previous sampling were acidic and had high EC values. This suggests low pH materials are not widespread and probably have limited influence to surface water quality. Lastly, the slightly negative ABA values of some materials are not expected to have impacts to water quality as these conditions do not appear to be widespread. The small amounts of acidity in some of the coal wastes is likely neutralized by the calcareous native soils within the watershed.

# **Meeting Minutes**

09-0040 004 Project No.:

Project: Madrid Mining Landscape

Date: February 18, 2011

Place: Sf County Administrative offices

Attending: John Kretzmann, Nicole Friedt, Tim Karpoff, Ken Romig, Robert

Griego, Beth Mills, Colleen Baker, Arnold Valdez

By: Ken Romig

Copies To: Parties Present Issue Date: March 2, 2011

### **Discussion Items:**

- 1. Ken & Tim presented a proposed agenda, which was agreed to by everyone:
  - a. Articulation by each party—the County, AML, URS and DPS—of their interests and/or goals for the implementation phase of the project;
  - General discussion on ideas for proceeding, particularly with regard to approaching the County Manager and following County processes.
- 2. Interests of County staff:
  - a. Education of Commissioners re: operation and maintenance responsibilities for facilities to be constructed in Madrid.
  - b. The County's financial obligations for O&M
  - c. The need to follow County legal requirements and procedures
  - d. Developing a strategy to move project ideas through the Technical Review Committee (TRT)
- 3. Interests of URS:
  - a. Creating drainage alternatives that are maintainable from the County's perspective. URS is developing two alternatives each for sedimentation, flooding and channel restoration.
- Interests of AML:
  - a. Building facilities that accord with community needs and AML priorities
  - b. Working in partnership with the County.
- Interests of DPS team:
  - a. Maintaining focus on addressing high-priority community needs
  - b. Continuing to build trust between the community, and County and AML.
  - c. Definitions of future DPS role in the development of the improvments.
- During the discussion, County staff expressed the concern that projects would face extensive and time-consuming permitting and regulatory requirements at the County level, particularly because there might be multiple, individual property modification applications submitted for County approval for each project. AML stated that it and/or its contractors that will act as an umbrella to the multiple landowners and will be primary applicant for improvements. This was a breakthrough in the discussion, and a relief to County staff.
- 7. County staff expressed their support—several times—for the approach AML and the DPS team have taken, even indicating that they have not been able to work as closely with the Madrid community as the team has on this project.
- Another breakthrough occurred when the group focused on developing a "resolution of support" by the County, instead of asking the County to "adopt" the plan. This was regarded as expressing a more appropriate role for the County, a less formal relationship, and easier to get passed by the Commission.
- There was considerable discussion about how and when to bring project ideas before the TRT for review. Usually the TRT focuses on technical reviews; however, because the plan will continue to be developed in stages, there will be a need for a conceptual review to assure that there is early communication with the TRT. Based on advice from the County staff at this meeting, the group decided on scheduling a "pre-application" meeting with the TRT, followed by the organization of a subset of the TRT to hear about projects in more detail from time to time. TRT and/or the sub-group will therefore have opportunities to comment on the plan for either action and/or revisions, as advice or direction to AML consultants pursuing County approvals. County staff will work with Ken to determine when it will be appropriate for him to present the project plans to the TRT and/or the follow-up sub-group.

10. The language of the resolution was considered, e.g.,

Suite 100 Albuquerque NM 87109 505.761.9700 fax 761.4222 www.dpsdesign.org

- a. "The Commission directs County staff to work with AML to develop project alternatives that are in keeping with County standards;:
- b. "The Commission directs staff to integrate community concerns into the development of project alternatives:"
- c. (Not mentioned at the meeting is the solicitation of letters of support from Madrid civic groups—which may support the resolution of support from the BCC)
- 11. Discussion also included the process of URS's work, including the development of an Ad Hoc work session made up of members of the TRT review committee that can collectively develop solutions with URS for consideration.
- 12. The County reiterated its interest in Madrid developing its own governance structure and would like to continue AML's work in Madrid.
- 13. URS will be developing alternatives in April and May.

### **Action Items:**

Ken: Develop draft resolution for consideration, review, editing and comment for County Staff

This report is assumed to be a true and accurate account of this communication unless notice to the contrary is received within 10 calendar days of issue.

### **End of Minutes**

# SANTA FE COUNTY RESOLUTION 2011-**XX**A RESOLUTION EXPRESSING SUPPORT FOR THE AML MADRID MINING LANDSCAPE COMMUNITY BASED PLAN

## WHEREAS, Santa Fe County recognizes:

That the legacy of coal mining in the village of Madrid has shaped of the landscape that contributes to the village's sense of place and identity, and;

WHEREAS, Historic coal mining practices and processing techniques have contributed to specific adverse environmental effects such as flooding, erosion and sedimentation, and; WHEREAS, the Abandoned Mine Land program has three priorities:

- Protection of health/safety and property from extreme danger of adverse effects of mineral mining and processing practices
- Protection of health and safety and general welfare from adverse effects of mineral mining and processing practices.
- Restoration of land and water resources and the environment previously degraded by the adverse effects of mineral mining and processing practices. (NMAML, 2010)

WHEREAS, The Abandoned Mine Land (AML) Program, a division of the New Mexico Energy and Minerals Department, has initiated, and funded a community-based planning process that has resulted in the identification of two projects that will improve the quality of life for Madrid residents.

WHEREAS, The AML Program intends to design and construct improvements to the public and private properties affected by the adverse effect of past mining practices,

WHEREAS, The AML program and its consultants will adhere to Federal, State and County ordinances, and regulations that oversee the review and approval of project reports, and construction documents.

NOW, THEREFORE, BE IT RESOLVED BY THE GOVERNING COUNTY OF SANTA FE COUNTY supports the community based planning effort and the quality of life projects articulated within the plan; and directs County departments, including but not limited to, Community Planning, Economic Development, Open Space and Trails, Public Works, Fire Department, Building and Development and Utilities, and associated staff to work with AML and their representatives to develop projects that further County goals and objectives.

PASSED, ADOPTED AND APPROVED
