NOTICE
FORM C-115B TEST ENVIRONMENT

December 22, 2021

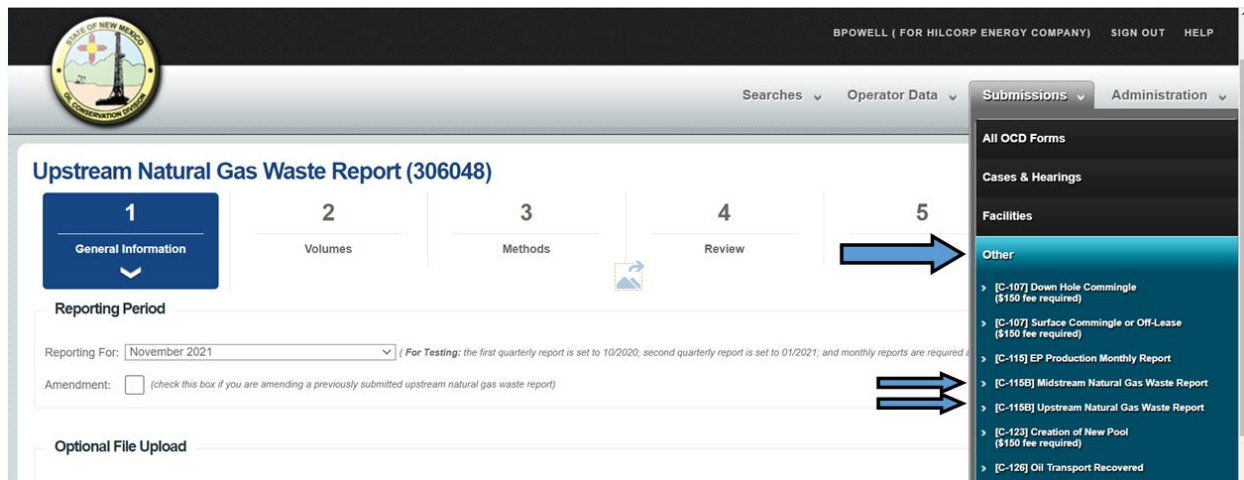

In accordance with 19.15.27 and 19.15.28 NMAC, beginning in April 2022, for each well or facility, the Operator shall separately report the volume of vented natural gas and volume of flared natural gas for each month in the categories specified in 19.15.27.8.G(2) and 19.15.28.8.F(2).

OCD has developed electronic C-115B forms. As part of ongoing stakeholder engagement, OCD has setup a test environment for Operators to test the tools that will be used to report their monthly venting and flaring volumes. Operators will login using their same Username and Password from the live OCD Permitting website. The Upstream Natural Gas Waste report utilizes a fixed file format similar to the C-115 form. Please see the attached file format for additional information.

The test environment can be found at the following link and is available for operators to test from 7am – 7pm MST on weekly business days.

<https://devwwwapps.emnrd.nm.gov/OCD/OCDPermitting/Default.aspx>

The new forms can be found in submissions section, located below

OCD requests feedback on the test environment tools as soon as possible but no later than close of business January 21, 2022.

Please direct any questions and feedback to EMNRD.Wasterule@state.nm.us.
