Public Announcement: C-145 Process Update – Streamlined OCD Permitting Feature Now Available

The New Mexico Oil Conservation Division is pleased to announce the release of a new feature within Certification Tab #7 of the C-145 process, designed to streamline and simplify permitting requests.

Key Changes Include:

-  **Centralized Permitting Requirements**
All notices of responsibility, document uploads, and certifications can now be reviewed and managed directly in Tab #7.
-  **No C-103 Required for BLM Sundry Approvals**
Attach approvals directly—no separate C-103 submission necessary.
-  **Change of Operator Requests Simplified**
Prior approvals for operator changes are no longer required.
-  **All-in-One Permitting Workflow**
The C-145 draft now serves as your single process for initiating and completing permitting actions.

We encourage all users to carefully review the instructions within Tab #7 to ensure full compliance with updated procedures.
