

**NOTICE OF PUBLICATION
STATE OF NEW MEXICO
ENERGY, MINERALS, AND NATURAL RESOURCES DEPARTMENT
OIL CONSERVATION DIVISION**

Pursuant to regulations regarding surface waste management facilities (19.15.36 NMAC) notice is hereby given that the Oil Conservation Division (OCD) received an application for a new facility on June 25, 2019.

Milestone Environmental Services, LLC (15721 Park Row, Suite 150 in Houston, Texas 77084) has submitted an application to construct and operate a new commercial surface waste management facility. The proposed facility is to be located approximately 14 miles west of Jal, NM on the north side of State Road 128 on 10 acres in Unit H of Section 25, Township 24 South, Range 34 East in Lea County. The waste management facility is intended for the permanent disposal of exempt and non-exempt/non-hazardous oil field waste, specifically, operation of a properly permitted Underground Injection Control (UIC) Class II disposal well for the injection of slurry into the subsurface. An associated surface facility will be used for the processing of the waste before injection. Residual waste materials not injected will be transported for proper disposal elsewhere and not permanently stored at the facility.

Pursuant to 19.15.36.9 A NMAC, the application is available upon request at 1220 South St. Francis Drive in Santa Fe, New Mexico 87505, or by calling (505) 476-3465. Any interested person wishing to be placed on a mailing list for notice regarding this permit application must make such a request at the phone number above.
