

PUBLIC NOTICE

STATE OF NEW MEXICO ENERGY, MINERALS AND NATURAL RESOURCES DEPARTMENT OIL CONSERVATION DIVISION

Notice is hereby given that pursuant to New Mexico Energy, Minerals and Natural Resources Department, Oil Conservation Division (19.15.30.15 NMAC), the following Stage 1 Abatement Plan has been submitted to the New Mexico Oil Conservation Division ("OCD") Environmental Bureau, 1220 S. Saint Francis Drive, Santa Fe, New Mexico 87505, Telephone (505) 476-3441, OCD.environmental@emnrd.nm.gov.

Enterprise Products Operating LLC, 1100 Louisiana Street, Houston, Texas 77002, has submitted a Stage 1 Abatement Plan (AP) for soil and groundwater impacts identified at the TW Products Pipeline Release Site located within Unit O, Section 16, Township 14 South, Range 35 East, in Lea County, New Mexico. The exact location of the release site is at latitude and longitude decimal degrees: 33.099816°, - 103.410090°. To aid in locating the Site, the approximate location is north-northwest of Lovington, New Mexico, 8.46 miles north of the intersection of Highway 82 and Tatum Highway, and 5.35 miles west of Tatum Highway.

On May 4, 2025, approximately 81 barrels of refined product (gasoline) were released from the pipeline. Approximately 5 barrels were recovered. Initial response activities were implemented to repair the pipeline and remediate hydrocarbon impacts at the site. Subsurface investigations concluded that the released product impacted the vadose zone and shallow groundwater at the Site. No surface water has been impacted by this release.

The Stage 1 AP proposes to confirm delineation of soil impacts through the installation of soil borings that will be converted to monitoring wells or soil vapor extraction wells at the Site. Groundwater sampling will be conducted subsequent to monitoring well installation. A mobile-dual phase extraction (MDPE) pilot test will be conducted to evaluate the effectiveness of MDPE for enhanced light non-aqueous phase liquid (LNAPL) and soil vapor recovery at the Site. The data obtained from the Stage 1 Abatement Plan activities will be evaluated to determine a preferred abatement plan remediation option at the site.

It is anticipated that the tasks associated with Stage 1 AP activities will be completed between November 2025 and January 2026. The Stage 1 AP addresses soil contaminant delineation, monitoring well installation, construction, development, groundwater monitoring, MDPE pilot tests, and reporting. Once the magnitude and extent of groundwater impacts are understood at the site, proposed remediation activities will be presented in a subsequent Stage 2 AP.

Additional information can be obtained from the Enterprise project contact:

Ms. Valarie Phipps
Environmental Engineer – Remediation
1100 Louisiana Street
Houston, Texas 77002
(713) 381-4698

The OCD has determined that the Stage 1 AP is administratively complete. The OCD will accept comments and statements of interest regarding this work plan and will create a facility-specific mailing list for persons who wish to receive future notices. Persons interested in obtaining further information, submitting comments, or requesting to be on a facility-specific mailing list may contact the OCD Environmental Bureau at the address given above.

The public may view a copy of the Stage 1 Abatement Plan online from OCD Permitting under incident ID# nAPP2512439394 at <http://www.emnrd.state.nm.us/oed/>. Persons interested in obtaining a copy of the Stage 1 AP may contact the OCD at the address given above. The OCD will accept written comments on the Stage 1 AP if the Director receives them within 30 days of publication of this notice.

Para obtener mas información sobre esta solicitud en español, sirvase comunicarse por favor: New Mexico Energy, Minerals and Natural Resources Department (Depto. Del Energia, Minerals y Recursos Naturales de Nuevo Mexico), Oil Conservation Division (Depto. Conservación Del Petróleo), 1220 South St. Francis Drive, Santa Fe, New Mexico (Contacto: OCD.environmental@emnrd.nm.gov).

Given under the Seal of New Mexico Oil Conservation Commission at Santa Fe, New Mexico, on this October 17, 2025.

STATE OF NEW MEXICO
OIL CONSERVATION DIVISION

Albert Chang, Director
