Independent Auditor's Report

State of New Mexico Energy, Minerals, and Natural Resources Department and Mr. Wayne Johnson New Mexico State Auditor

Report on Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information and budgetary comparisons for the general fund and major special revenue funds of the State of New Mexico Energy, Minerals, and Natural Resources Department (the "Department") as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Department's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatements, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider

F 602.730.3699

Phoenix

internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion.

An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information and budgetary comparisons for the general fund and major special revenue funds of the Department as of June 30, 2018, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 1, the financial statements of the Department are intended to present the financial position and changes in financial position of only that portion of the governmental activities, each major fund, and aggregate remaining fund information of the State of New Mexico that is attributable to the transactions of the Department. They do not purport to, and do not present fairly the financial position of the entire State of New Mexico as of June 30, 2018, and the changes in the financial position for the year then ended, in conformity with accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, schedule of revenues and expenditures – budget and actual (budgetary basis) – general fund by appropriation, schedule of revenues and expenditures – budget and actual (budgetary basis) – emergency fire disaster fund by appropriation, schedule of revenues and expenditures – budget and actual (budgetary basis) – debt service fund, and schedule of revenues and expenditures – budget and actual (budgetary basis) – capital projects GGRT fund be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements.

We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Department's basic financial statements. The combining financial statements, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The schedule of expenditures of federal awards, is presented for purposes of additional analysis, as required by Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, and is also not a required part of the basis financial statements. The other supplementary information as identified in the table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements and schedule of expenditures of federal awards, are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with the auditing standards generally accepted in the United States of America. In our opinion, the combining financial statements and schedule of expenditures of federal awards, are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The other supplementary information, as listed in the table of contents, has not been subjected to the auditing procedures applied in the audit of the basic financial statements and accordingly, we do not express an opinion or provide any assurance on it.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated October 30, 2018, on our consideration of the Department's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Department's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Department's internal control over financial reporting and compliance.

Albuquerque, New Mexico

October 30, 2018

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

The State of New Mexico Energy, Minerals, and Natural Resources Department's (the "Department") discussion and analysis is designed to assist the reader in focusing on significant financial issues, provide an overview of the Department's financial activity, identify changes in the Department's financial position (ability to address future year challenges), identify any material deviations from the financial plan, and identify any fund issues of concern.

Management's Discussion and Analysis (MD&A) is designed to focus on the past year's activities, resulting changes and currently known facts. Please read this report in conjunction with the Department's financial statements and notes which follow this section.

Financial Highlights

- The Department's governmental net position increased by \$3,003,586 in fiscal year 2018.
- The Department's total revenues increased by \$1,824,161 for fiscal year 2018.
- The total cost of all Department programs was \$72,014,155, an decrease of \$1,449,543 for fiscal year 2018.

Mission

The mission of the Department is to position the State of New Mexico as a leader in energy and natural resource management. To meet this mandate, the Department uses a flexible, team-based management system that is proactive demands accountability and concentrates on customer service. The system allows the Department to provide leadership in the protection, management, conservation and responsible use of the state's natural resources.

The Department is charged with protecting the environment and ensuring the reclamation of land and resources affected by mining activities, growing and sustaining healthy forests; leading the development of reliable energy supplies and improving the state's parks system while sustaining cultural and natural resources.

Program Highlights

Youth Conservation Corps. The Youth Conservation Corps (YCC) was created in 1992 to provide a process to employ the youth in public projects. Participants learn employment skills, work ethics, as well as self-discipline and self-esteem. The YCC Promotes the education, success and well-being of the youth of New Mexico through the conservation and enhancement of the state's natural resources and lasting community benefits. The Youth Conservation Corps (YCC) Commission continues to improve relationships with educational institutions, nonprofit organizations, Native American tribes, local governments, federal and state agencies and our Project Sponsors. By developing strong partnerships, the YCC Commission is confident that YCC is expanding its services and opportunities to our communities and the young people of the

Management's Discussion and Analysis June 30, 2018

State of New Mexico. The Project Sponsors are required to contribute financially to the Project which results in additional benefits for the state.

Renewable Energy and Energy Efficiency. The Energy Conservation and Management Division (ECMD) plans and administers the Renewable Energy and Energy Efficiency Program to develop and implement effective clean energy programs – renewable energy, energy efficiency and conservation, alternative fuels, and safe transportation of radioactive waste – to promote and administer policies for environmental and economic sustainability and to protect public health and safety for New Mexico and its citizens. The Program's goals of reduced energy consumption and expenditures and effective administration of federally funded programs lead to many achievements for the state, including generation of new jobs and revenues; environmental protection and improvement; enhancement of public health; decreased consumptive water use for power generation; lessened dependence on foreign oil; and greater energy security. ECMD is currently working on a New Mexico Energy Roadmap project and will implement a series of technical evaluations, stakeholder engagements, and coordinated strategies using a scenario-based planning process to craft and implement a cohesive and effective energy roadmap for New Mexico.

ECMD provides services to implement statutorily-required state and federal clean energy programs. Technical assistance is provided to the public, industry, and state-funded agencies on renewable energy, energy efficiency, conservation, alternative transportation, and building codes. Beneficiaries vary by program area and include individual citizens/taxpayers, corporate taxpayers, landowners, facility owners, utilities, renewable energy developers, and private-sector businesses and vendors contracted for energy efficiency and renewable energy projects. Public sector beneficiaries include public schools, universities and community colleges; state government agencies, cities, counties, and tribal organizations.

ECMD provides oversight for Clean Energy tax incentive programs, administers federal programs, develops and manages regulations for implementation of geothermal resource development, reviews technical studies to provide certifications as required by law, manages and administers policies for safe transportation of radioactive waste, compiles reports required under existing federal and state legislation, and monitors Clean Energy Projects.

Healthy Forests Program. The New Mexico State Forestry Division's (State Forestry Division) role is to protect and improve New Mexico's forest and watershed health. This mission supports two fronts: advocacy for forest and watershed restoration, and wildland fire prevention and suppression. These unified goals comprise the Healthy Forests Program. Forest and watershed health achievements require strong partnerships and collaborations between local, state, tribal, federal, and private entities. The State Forestry Division leads these partnerships through statewide collaborative working groups. Its leadership includes the forestry field offices that

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

follow the New Mexico Forest Action Plan to establish and maintain a collaborative, landscapescale framework to achieve the Healthy Forests Program's goals.

The fire season for FY2018 was considered severe and resulted in 561 statistical fires and required eighteen executive orders (\$13,500,000) authorized by Governor Martinez. Extenuation drought, with little to no winter snow pack, high temperatures and low humidity drove numerous wildland fires that cost nearly \$21.5 million dollars to manage and resulted in over 241,979 statistical acres burned. A few of the more notable fires were the Stateline fire (Union County) consuming 17,662 acres and was complicated by crossing into several jurisdictions to include Colorado, portions of Texas and Oklahoma. The 246 Fire (Lincoln County) burned 3,357 acres and resulted in the loss of four homes and fifteen outbuildings. The OK Bar and San Luis fires (Hidalgo County) burned over 71,314 acres combined and the San Luis fire stated in Mexico and crossed into the United States on May 17, 2018. The Ute Park Fire (Colfax County) burned 36,740 acres and cost over \$9.1 million. The Emily Fire (Mora County) cost over \$1.56 million and was a tough fire to manage due to the rugged terrain and the high dollar investments (i.e. communication towers) that required full fire suppression.

Compared to other Western States that continue to face an ongoing fire season and hundreds of millions of dollars spent suppressing wildland fires; New Mexico managed the 2018 fire season very well. The severe weather and intense fire conditions over an extenuating period was challenging and stressful, however, New Mexico is proud to say that no lives were lost, but sadly nine homes and thirty-three outlying buildings were lost or damaged during the FY2018 fire season. While sad, this is considered a low number of losses considered the severity of the fires in FY2018. The success of a fire season is measured on the ability to prepare our firefighters with annual training (1,205 firefighters in FY2018), replace and equip our wildland fire vehicles and routinely upgrade equipment when needed. Pre-positioning of our fire fighters assisted in the suppression of new fire starts with quick containment. The utilization of the Western States Compact Agreement allowed the Division to request a strike team from other states to pre-position them in locations where the Division knew fire starts were more likely to occur.

The Division was unsuccessful at receiving a Capital Outlay appropriation during FY2018 for Watershed Restoration Projects. The lack of additional funding and weather conditions slowed the prescriptive treatment of forested areas allowing for 13,226 acres of treatment, which fell short of the target measure of 15,500 acres. However, continued partnerships with the United States Forest Services and the New Mexico Game and Fish Department, the Forestry Division was able to continue the mission of treating and protecting our forests by reducing hazardous fuels, improving the health of the forests and protecting valuable watersheds.

The Division's Inmate Work Camp, annual seedling sales and re-leaf programs continue to be successful. On-going outreach and educational programs continue to spread the message that the management and protection of our forests are vital to our lively hood.

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

Mining and Minerals Division (MMD). The Mine Reclamation Program continues to make strides in assuring the responsible utilization, reclamation and safeguarding of New Mexico's lands affected by mining. New Mexico is a leader in responsible mine operation and reclamation.

The Abandoned Mine Land Program (AMLP) implements a federally funded program that reclaims and safeguards high priority coal and noncoal abandoned mines and mine land in New Mexico. AMLP's mandate is to protect public health, public safety, and property from the danger and adverse effects of historic mining practices and to restore land, water resources and the environment degraded by the same adverse effects. MMD estimates that more than 15,000 hazardous mine openings remain un-reclaimed throughout New Mexico. Most of the funding for the Program comes through the Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior. The Bureau of Land Management New Mexico (BLM) has also granted money to the Program to the Program in recent years for work on abandoned mines on and near BLM lands.

The Coal Mine Reclamation Program (CMRP) is responsible for regulating coal mines on all federal, state and private lands within New Mexico, except for Indian lands. CMRP's mandate is to protect the public, adjacent landowners and the environment from the effects of mining. CMRP oversees more than 80,000 acres of permitted mine lands and \$287 million in third party surety bonds as financial assurance that these mines will be properly reclaimed. CMRP currently has eight coal mines under permit, although only three, Westmoreland Coal's San Juan Underground Mine, and Peabody's Lee Ranch Surface Mine and El Segundo Surface Mine are currently extracting coal. Chevron's McKinley, Ancho, and York Canyon Surface and Underground mines, as well as Westmoreland Coal's La Plata Mine are passing through the minimum ten-year post reclamation bond liability period, during which the ability to support the approved post mine land use is demonstrated. Processing applications for liability bond release, upon demonstration of successful reclamation, is a large part of CMRP's current workload.

The Mine Registration, Reporting and Safeguarding Program (MRRSP) ensures decision-makers throughout New Mexico benefit from the valuable information compiled and disseminated through this program. Comprehensive information is provided on mineral resources, mine registration, reclamation and safeguarding efforts, legislation, and other MMD activities related to New Mexico's mineral extraction industry and mineral resources. A public portal now provides information linked to the latest MMD database content: MMD Online, although, by statute, production information is kept confidential. The program prides itself on its responsiveness to questions received via telephone or email.

The Mining Act Reclamation Program (MARP) is responsible for regulating hard rock mines on all federal, state and private lands within New Mexico. MARP's mandate is to promote responsible utilization and reclamation of lands affected by exploration and mining. MARP oversees the reclamation of all exploration and extraction activities conducted at all mines and

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

mills, excluding coal, potash and aggregate mines. MARP has permitted 633 mining and exploration projects encompassing over \$683 million in financial assurance. The overall distributed acreage under permit with MARP is 26,250 acres. The number of acres reclaimed throughout the history of the Program (1994-2016) totals 7,044 acres.

MARP is committing time and resources to the development of planning and remediation designs to reclaim the Questa Mine and Tailings facility in Questa, NM. The site was under a Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) action for several years. After the announcement of a permanent closure in June 2014, those plans are now being implemented, with the signing of a Consent Decree. MARP is procession revisions and expansions for the FMI Copper Mines in the southwestern New Mexico. The three largest copper mines in the states are going through rapid expansion with the price of copper currently up. MARP is finishing a long process to approve a permit for the Copper Flat Mine, which will be the first regular new mine permitted. A lengthy public review process must be completed before the permit can be approved. The EPA and state agencies are working on another CERLA action to address impacts from uranium mining in the San Mateo Creek Basin.

State Parks. Established in 1933 with four parks, the New Mexico State Parks Division (State Parks Division) has grown into a 34-park system that includes 19 lakes and nearly 191,586 surface acres of land and water. State Parks can be found in 25 of New Mexico's 33 counties. New Mexicans and visitors to the Land of Enchantment want and deserve access to their natural and cultural resources for enrichment and to improve their quality of life.

The State Parks Division plays an integral role in creating and sustaining jobs, supporting communities, generating tax revenue and is critical to driving our state economy. State Parks are an important part of the state's outdoor recreation economy, which overall contributes \$6.1 billion in consumer spending, provides for 68,000 jobs and \$458 million in state and local taxes annually (source: Statewide Comprehensive Outdoor Recreation Plan 2016). Visitation at state parks directly correlates to economic activity in the state, particularly in rural areas where many of the parks are located.

As an enterprise agency, the State Parks Division is currently required to generate 75% of its operating budget through self-generated revenues, such as camping and admission fees, concession fees, other state/federal funds. In fiscal year 2018, State Parks revenues were approximately \$5.8 million with a total of nearly 5.0 million visitors to parks.

Oil and Gas Conservation Program. The Oil Conservation Division (O.C. Division) continues to effectively regulate the oil and gas industry pursuant to its statutory charge under the Oil and Gas Act. The O.C. Division oversees drilling, production and plugging operations on approximately 24,000 active oil and gas wells on state and fee lands, and works with the Bureau

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

of Land Management (BLM) to help manage an additional 33,000 active oil and gas wells on federal land. There are currently 561 different oil and gas operators in New Mexico.

In addition to active producing wells, the O.C. Division also oversees, pursuant to the Federal Underground Injection Control (UIC) Program, approximately 4,000 active injection and produced water disposal wells. The O.C. Division is charged by the UIC Program, and by its statutory duty, to ensure that injection of fluids into deep underground formations does not result in the contamination of fresh water aquifers and does not "drown out" oil and gas reservoirs thereby effectively causing the waste of reserves. Lastly, the O.C. Division also effectively manages this program to ensure that injection of produced water does not cause seismic activity within the state. The O.C. Division does receive a federal grant for implementing the UIC program, but, historically, the cost to carry out the program far exceeds the grant allocation.

The O.C. Division utilizes Oil and Gas Reclamation Fund ("Reclamation Fund") monies to plug abandoned oil, gas and injection wells on state and fee lands. In addition, the O.C. Division applied for and obtained a grant from the BLM to plug abandoned oil, gas, and injection wells on federal lands within the state.

The O.C. Division continues to meet the challenge associated with the delineation and remediation of spills and leaks of oilfield fluids. The goal to protect fresh water resources from this type of activity remains one of the biggest challenges facing the O.C. Division now and in years to come.

The O.C. Division continues to participate in projects related to the Carlsbad brine well including maintenance of an early warning system and technical measurement of the proclivity of that cavern's collapse. In addition to providing data analysis and monitoring, O.C. Division staff members provide technical guidance to other government entities involved in the project and participate in committees that have been formed to plan for a successful resolution to the situation. During the last legislative session of FY2017, HB 29 and SB4 were passed creating the Carlsbad Brine Well Remediation Advisory Authority. The Division was appropriated a total of \$45 million over three years to begin planning, design, and remediation of the Carlsbad Brine Well through an awarded request for proposal to a reputable vendor who has extensive knowledge and expertise in this type of remediation project.

Program Support. Program Support consists of the Office of the Secretary (OFS), as well as the administrative support functions (Legal, HR, Fiscal and IT). The purpose of the program is to support the Energy, Conservation and Management Division, Forestry Division, State Parks Division, Mining and Minerals Division, and the Oil Conservation Division, by providing administrative services as well as policy direction and management. The program also provides administrative support to the Youth Conservation Corps Commission, an entity administratively

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

attached to the Department, pursuant to an agreement between the Department and the YCC Commission.

The Office of the Secretary provides policy direction for the Department and its communications with The Office of the Governor, the New Mexico State Legislature and other State Agencies. In addition, the Secretary has administrative oversight of the Waste Isolation Pilot Plant Transportation Safety Coordinator, the New Mexico Department of Game and Fish, the Game Commission, and the Youth Conservation Corps.

The Information Technology Office (ITO) operates and develops information technology (IT) systems and projects that support the agency goals and initiatives. IT encompasses computer and communications infrastructure, including hardware and software, security, communications (voice and data) and databases, as well as the applications that run on, or use, that infrastructure to deliver the actual services to internal and external customers. ITO is also responsible for the department's IT planning, policy and procedures; and approves all IT purchases. The Information Technology Office is the central information technology and information systems provider for the Department. The Information Technology Office is responsible for maintaining and supporting computer systems, network-telecommunications infrastructure and application development needs of the department, using the latest technology for windows applications and web applications on the Intranet and Internet.

Additionally, ITO provides the focus for the development of information technology and information systems strategy and policy for the department. Administrative Services Division directs the department's financial operations, particularly budget, federal grants and accounting and support services. Responsibilities include the oversight of the Department's annual audit.

The Administrative Services Division (ASD) provides administrative and fiscal support to all divisions and bureaus of the department. ASD is responsible for the final approval of all purchases orders and payments vouchers for the department and serving at the communicator of all financial issues with the Department of Finance and Administration, General Services Department (GSD) and the Legislative Finance Committee. ASD is responsible for the development and issuance of the Departments operating budget each fiscal year and ensure that appropriate budget is available for all division to meet their statutory obligations. ASD is also responsible for filing all financial status reports for all federal as required under the Federal Code of regulations. The ASD is responsible for ensuring at all financial transactions are accounted for in the state accounting system and that all financial transaction meet the state benefit obligation at the best price possible.

In addition, the ASD division tracks and accounts for all fixed assets purchases and disposed by the Department. Each fiscal year ASD is responsible for the Departments independent compliance and financial audit due each fiscal year per the state audit act.

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

The Human Resource Bureau supports the Department and its employees in all aspects of personnel administration, personnel policy and benefits. The Program beneficiaries are Energy, Conservation and Management, Forestry, State Parks, Mining and Minerals, the Oil Conservation Divisions and the Youth Conservation Corps.

Using This Annual Report

The focus of this report is on both the Department (government-wide) and the major individual funds. Both perspectives (government-wide and major funds) allow the user to address relevant questions, broaden a basis for comparison and enhance accountability. Although the Department is one of several agencies within the State of New Mexico Government, the primary Government focus in this financial report is the Department and not the State of New Mexico as a whole.

Management's Discussion and Analysis

MD&A should provide an objective and easily readable analysis of the Department's financial activities based on currently known facts, decisions or conditions. It should provide an analysis of the Department's overall financial position and results of operations to assist users in assessing whether the financial position has improved as a result of the year's activities. Additionally, it should provide an analysis of significant changes that occur in funds and significant budget variances.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the Department's basic financial statements. The Department's basic financial statements comprise four components: 1) government-wide financial statements, 2) fund financial statements, 3) budgetary comparisons, and 4) notes to the financial statements. This report also contains supplementary information, including the schedule of expenditures of federal grants, in addition to the basic financial statements themselves.

Government-Wide Financial Statements. The government-wide financial statements consist of a statement of net position and a statement of activities. These statements should report all of the assets, liabilities, revenues, expenses, and gains and losses of the government.

Most of the Department's basic services are included in the governmental activities. State appropriations and federal grants finance most of these activities. The funds included in Governmental Activities for the Department are the General Operating Fund, Special Revenue Funds, Debt Service Fund and Capital Project Funds.

GASBS No. 34 requires that infrastructure assets (roads, bridges, traffic signals, etc.) be valued and reported within the Governmental column of the Government-wide Statements. Additionally, the government must elect to either depreciate these assets over their estimated

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

useful life or develop a system of asset management designed to maintain the service delivery potential. The Department does not own a material interest in any infrastructure assets and, therefore, is not required to implement this portion of GASBS No. 34.

Fund Financial Statements. Fund financial statements consist of a series of statements that focus on information about the major governmental and enterprise funds. Governmental fund financial statements also report information about a government's fiduciary funds. Governmental fund financial statements are prepared using the current financial resources measurement focus and the modified accrual basis of accounting. Fiduciary fund financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting. The fund financial statements are similar to the financial statements presented in the previous accounting model. The Department has one type of fund: governmental funds.

Governmental Funds. Most of the Department's services are included in governmental funds which focus on: (1) how cash and other financial assets that can be readily converted to cash flow in and out, and (2) the balances left at year-end that are available for spending. The governmental fund statements provide a detailed short-term view and help the user determine whether there are more or fewer financial resources that can be spent in the near future to finance the Department's programs.

Since this information does not include the additional long-term focus of the government-wide statements, reconciliation between the government-wide statements and the fund financial statements is provided for governmental-type activities.

Budgetary Comparisons

In addition to the MD&A, GASBS No. 34 requires budgetary comparison schedules for the general fund and for each major special revenue fund that has a legally adopted annual budget to be presented as Required Supplementary Information (RSI).

The budgetary comparison schedules should present both the original and the final appropriated budgets for the reporting period, as well as the actual inflows, outflow and balances, stated on the government's budgetary basis. This information is provided at the approved budget level to demonstrate compliance with legal requirements.

The budget to actual statement reflected a significant difference between budgeted federal revenues and actual revenues, as well as budgeted expenditures and actual expenditures. The primary cause for both of these differences is related to multi-year federal grants and the related contractual obligations against these grants. The budgeted federal revenues and expenditures (both in the Contractual and Other Costs categories) are higher based on encumbering the entire amount of these multi-year federal contracts. Because the full amounts of these multi-year contracts are encumbered, there is a related increase in the budgeted revenues and budgeted

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

expenditures. The actual federal revenues and expenditures only include expended funds for this fiscal year and are therefore significantly lower than budgeted amounts. This difference does not indicate a significant shortfall in budgeted revenues or expenditures, but is instead related to the process of fully encumbering multi-year federal grant commitments.

Notes to the Financial Statements

The notes to the financial statements consist of notes that provide information that is essential to a user's understanding of the basic financial statements.

Financial Analysis of the Department as a Whole

Net position. Table A-1 summarizes the Department's net position for the fiscal year ended June 30, 2018. Total Department net position for fiscal year 2018 was \$108,584,609.

Unrestricted net position in Governmental Activities was a negative \$1,651,595 at the end of the fiscal year. Restricted net position including capital projects, debt service and special appropriations was \$45,873,729.

The balance of \$61,841,524 in net position represents those invested in capital assets, net of related debt (buildings, equipment, etc.).

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

The Department's net position increased \$3,003,586 over the course of this fiscal year's operations. The following financial information is a comparison of net position for 2018 and 2017.

The total assets consist of cash and cash equivalents, investment in the State General Fund Investment Pool (SGFIP), receivables from the federal government for grants, receivables from other state agencies, other receivables and capital assets (net of accumulated depreciation). Total liabilities consist of accrued interest payable, accounts payable, accrued salaries and employee benefits payable, amounts due to the state's general fund and other agencies and the current amount of other obligations and compensated absences payable. Net position is comprised of investment in capital assets, restricted and unrestricted amounts.

The variances consist of:

Total assets. The variance of current and other assets is due to the fact that cash, cash equivalents and investment in the SGFIP increased by \$13,181,985 from fiscal year 2017 primarily due to the increase in the Emergency Fire Disaster balance in the SGFIP by \$13,706,348. Also there was an increase in net receivables of approximately \$1.4 million from fiscal year 2017 primarily due to an overall increase of \$1.2 million due from the federal government at year end. Net capital assets decreased from the fiscal year 2017 stated amount by \$6.7 million, partly due to the transfer of Vietnam Veterans' Memorial State Park located in Colfax County, New Mexico, to the New Mexico Department of Veterans' Services and the transfer of Mesilla Valley State Park to the New Mexico Department of Game and Fish.

Total liabilities. Current liabilities increased by \$5.3 million, a major factor contributing to the variance was an increase in accounts payable by \$1.9 million, due to the increased number and severity of fires that occurred in fiscal year 2018 and the addition of deficiency in state treasurer general fund investment pool by \$1.7 million due to the agency paying federal obligations against federal grants and federal fire reimbursements.

Total net position. The net position for the Department increased from 2017 by \$3.0 million. The Department's total revenue increased by approximately 2.0%, from \$73,193,580 to \$75,017,741. The Department's total expenses decreased by approximately 2%, from \$73,463,698 to \$72,014,155.

Changes in Net Position

The Department's change in net position for fiscal year 2018 was an increase of \$3,003,586 (see Table A-2). A significant portion, forty percent (40%), of the Department's revenue comes from State General Fund Appropriations. Twenty-nine percent (29%) comes from federal grant funds,

Management's Discussion and Analysis June 30, 2018

fourteen percent (14%) comes from gross receipts tax and eight percent (8.0%) comes from charges for services.

Total Revenues. Revenue received is comprised mostly of appropriations from the state's general fund, but also includes federal grant funds, gross receipts tax, bond proceeds, severance tax, interest, gasoline tax and other miscellaneous revenue. Also included in revenue are charges for services of \$5,986,552, which include park admissions, overnight camping, concessionaire income, license and permit sales, and land and shelter rentals.

Management's Discussion and Analysis June 30, 2018

Total Expenses. The expenses consist of personnel services and benefits. Due to the nature of the Department's activities in the areas of mining, oil production, etc., the Department is staffed with a high volume of technical positions and engineers. In addition, expenditures also include the cost of salaries, overtime and other costs associated with fire suppression activities.

Another area of expenditures within the Department is the category of contractual services, which includes costs associated with fire suppression activities. In addition, this category is used to flow federal grant funds through to local communities within the state.

Significant expenditures within the Department were in the category of other costs. This category pays for operational expenses of the Department including utilities, postage and rent of equipment, which are a major portion of the Department costs with 35 field offices statewide. The majority of expenditures within this category are the costs associated with forest protection and safeguarding activities, abandoned mine reclamation, and oil and gas well reclamation projects, as well as Joint Powers Agreements for construction of outdoor recreational trails projects and conservation projects under the YCC program.

Governmental Activities by Program

The Department has multiple and varied programs that our resources fund. The Divisions within our Department include the Energy Conservation and Management Division, the Forestry Division, the Mine Reclamation Division, the Oil and Gas Conservation Division, the State Parks Division, Youth Conservation Corps, Multiple Capital Projects and the Program Support Division. The table below shows the expenses by division/program and the percentage of all expenses, which was taken from the fund financial statements. The difference in this amount and the amount shown in the statement of activities is approximately \$60,188,756, which is mainly comprised of adjustments made for depreciation, capital outlay, compensated absences and debt service.

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis
June 30, 2018

Table A-3
Governmental Activities by Program

Program	Expenses	Percentage Spent by Program
Forestry and Fire Disasters	\$ 22,701,532	34%
State Parks	17,181,456	26%
Oil and Gas Conservation	6,811,375	10%
Mine Reclamation	6,132,866	9%
Renewable Energy and Energy Efficiency	4,616,688	7%
Program Support	4,332,153	7%
Youth Conservation Corps	 4,029,829	6%
	\$ 65,805,899 *	:

^{*}The capital outlay and debt payments are not included in this schedule as they are not current functional expenditures.

As the Department completed the year, its governmental funds reported a combined fund balance of \$45,874,902, which is an increase of \$9,443,782 from last year. The increase is primarily due to an increase in appropriation be \$6,192,895 and fewer expenses in debt services due to the payoff of multiple long-term debt obligations in prior year 2017.

The ending fund balance of \$45,874,902 is comprised of amounts restricted and unassigned. The restricted fund balance is \$45,873,729 and \$1,173 is categorized as unassigned.

The General Fund is the chief operating fund for the Department. It accounts for revenue and expenses not designated for specific purposes in all the program areas except Parks. The Parks fund is nonreverting, while the General Fund reverts all unassigned fund balance.

The total fund balance of the Department's general fund decreased by \$9,802 during the current fiscal year in the Energy Conservation Management Division for federal WIPP related revenue collected.

Besides the General Fund, the other major funds were the Carlsbad Brine Well Fund, Emergency Fire Disaster Fund, State Parks Fund, Youth Conservation Corps Fund, Debt Service Fund, and the Capital Projects GGRT Fund. Changes in these fund balances from FY18 are as follows:

- The Carlsbad Brine Well Fund increased by \$3,369,287.
- The Emergency Fire Disaster Fund increased by \$4,256,415.

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

- The State Parks Fund increased by \$498,514.
- The Youth Conservation Corps Fund increased by \$1,324,372.
- The Debt Service Fund decreased by \$533,901.
- The Capital Projects GGRT Fund increased by \$1,756,402.

General Fund Budgetary Highlights

The New Mexico State Legislature makes annual appropriations to the Department. Amendments to the appropriated budget require approval by the Budget Division of the Department of Finance and Administration with review by the Legislative Finance Committee.

Over the course of the year, the Department adjusts its budget as authorized in the Appropriations Act. The budget adjustments fall into four categories:

- Supplemental and special appropriations that are reflected in the actual beginning account balances (correcting the estimated amounts in the budget adopted for the fiscal year).
- Capital Improvement Project appropriations that are budgeted during the year based on legislative appropriations.
- Budget adjustment requests made during the fiscal year to allow the Department to utilize funds where needed.
- Budget adjustment requests that increase or decrease other state funds based on actual revenues.

The Governor issued 18 executive orders for fiscal year 2018 for emergency fire suppression activities in the amount of \$13,500,000.

Capital Assets and Debt Administration

At the end of fiscal year 2018, the Department has invested a total of \$157,829,967 in governmental-type activities in a variety of capital assets (fixed assets). This amount represents a net decrease (including additions and deductions, excluding depreciations) of \$3,945,600, which is approximately a 2.4% decrease over last fiscal year. The major increases in capital assets during the fiscal year were in the areas of buildings and improvements, land improvements, and vehicles and automotive. The State Parks Division funds numerous capital projects annually to include various boat ramp extensions, visitor center remodeling, statewide water and wastewater improvements, statewide shelter/picnic table replacements, campground facilities construction and enhancement, and repairs to historic administration buildings and walkways. This is due in part to a concerted effort by the State Parks Division to maintain facilities in a manner that will attract both in-state and out-of-state visitors.

Management's Discussion and Analysis

Projects in process		3.3		1.5		1.8	120.0							
Easements and other intangibles		8.2		8.2			-							
Total assets	\$	157.8	\$	161.6	\$	(3.8)	(2.4) %							

The Department has many capital projects in process, several which are tentatively scheduled for completion next fiscal year. More detailed information about the Department's capital assets is presented in Note 7 to the financial statements. Accumulated depreciation for these capital assets is calculated at \$93,601,551.

GASBS No. 34 requires the recording and depreciation of infrastructure assets such as roads, bridges, traffic signals, etc. The Department does not own a material interest in any infrastructure assets.

Long-Term Debt

The Department's long-term debt was reduced from six outstanding bond issues to one outstanding bond issues. At the end of fiscal year 2018, the amount outstanding on this remaining obligation was \$2.4 million. Detailed information about the Department's long-term debt is presented in Note 9 to the financial statements.

Economic Factors and Next Year's Budget and Rates

The Department's budget is appropriated to the following programs:

- Energy Conservation and Management
- Healthy Forest

Energy, Mineral, and Natural Resources Department

Management's Discussion and Analysis June 30, 2018

- State Parks
- Mining and Minerals
- Oil Conservation
- Program Support

The Department's operating budget for fiscal year 2019 is \$13,210,000 and includes 492 full time equivalents (FTE).

As required by the Accountability in Government Act, fiscal year 2019 was the 18th year the Department has submitted performance based and program budgets. The Department continues to work with the Legislative Finance Committee (LFC) and the State Budget Division to report and streamline measures that are meaningful and useful.

Natural gas prices remained stable, but oil and prices increased further in fiscal year 2018, with an even greater increase drilling activity and the largest growth in oil production experienced in modern New Mexico history. Average New Mexico prices in fiscal year 2018 for crude oil and natural gas were \$54.40 per barrel and \$3.25 per thousand cubic feet, respectively. New Mexico's oil production of 200 million barrels in fiscal year 2018 reached record levels, making New Mexico the third largest producing state for oil, as well as the ninth largest for natural gas.

Oil and natural gas related growth, including severance, federal mineral leasing bonus and royalty payments, and gross receipts tax revenue growth associated with oil exploration, is expected to be the largest driver of revenue growth in fiscal year 2019. Fiscal year 2019 ending reserves are projected to be \$2,164 million or 34.2 percent of recurring appropriations if no additional FY 2019 supplemental or special appropriations are made during the 2019 legislative session.

Contacting The Department's Financial Management

This financial report is designed to provide citizens, taxpayers, customers, legislators and investors and creditors with a general overview of the Department's finances and to demonstrate the Department's accountability for the money it receives. Reconciliation of the Balance Sheet—Governmental Funds to the Statement of Net Position June 30, 2018

Total fund balance - governmental funds (governmental fund balance sheet)		\$ 45,874,902
Amounts reported for governmental activities in the statement of net position are different because:		
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds.		
Cost of capital assets	\$ 157,829,967	
Accumulated depreciation	 (93,601,551)	
Total capital assets		64,228,416
Long-term and certain other liabilities, including bonds payable, are not due and payable in the current period and, therefore, are not reported as liabilities in the funds.		
Long-term and other liabilities at year end consist of:		
Bonds payable	(2,386,892)	
Accrued interest payable	(14,954)	
Compensated absences payable	 (1,637,814)	
Total long-term and other liabilities		 (4,039,660)

\$ 106,063,658

Reconciliation of the Revenues, Expenditures, and Changes in Fund Balances— Governmental Funds to the Statement of Activities June 30, 2018

Net changes in fund balances - total governmental funds (statement of revenues, expenditures, and changes in fund balances)		\$ 9,443,782
Amounts reported for governmental activities in the statement of activities are different because:		
In the statement of activities, certain operating expenses - compensated absences (sick and annual leave) are measured by the amounts earned during the year. In the governmental funds, however, expenditures for these items are measured by the amounts of financial resources used (essentially, the amounts actually paid). The increase in the liabilities for the fiscal year was:		(142,664)
Repayment of bond and note principal is an expenditure in the governmental funds, but it reduces long-term liabilities in the statement of net assets and does not affect the statement of activities. Bond and note payments during the current fiscal year were:		421,553
Interest on long-term debt in the statement of activities differs from the amount reported in the governmental funds because interest is recorded as an expenditure in the funds when it is due, and thus requires the use of current financial resources. In the statement of activities, however, interest expense is recognized as the interest accrued, regardless of when it is due. The additional interest reported in the statement of activities is the net result of two factors: accrued interest on bonds and notes payable. The decrease in the liability for the fiscal year was:		4,285
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. In the current period, these amounts were:		
Capital outlay Depreciation expense Excess of depreciation expense over capital outlay	\$ 3,565,748 (5,950,157)	(2,384,409)
The cost of the capital assets net of accumulated depreciation reported as a transfer out to another agency was:		(4,290,809)
The statement of activities reports the loss on the sale of equipment, while the statement of revenues, expenditures and changes in fund balance reports the proceeds. The reconciling amount is the difference:		 (48,152)
Change in net position of governmental activities (statement of activities)		\$ 3,003,586

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

1) Definition of Reporting Entity

On July 1, 1987, the Energy, Minerals, and Natural Resources Department (the "Department") was formed by Section 95A-1 through 95A-7, 1978 NMSA. The basic function of the Department is to maintain responsibility for the protection, preservation and proper utilization of extractive and renewable resources residing within the state. These include, but are not limited to, petroleum, natural gas, coal, uranium, potash, timber, soils and wildlife. The Department administers programs directed toward the promotion of energy conservation, outdoor recreation and natural resources planning. The Department does not have any component units.

The chief executive of the Department is the Cabinet Secretary, who is appointed by the Governor of New Mexico and is a member of the Governor's cabinet. The Department is a "department" of the executive branch and these financial statements include all funds and activities over which the Department Cabinet Secretary has oversight responsibility.

Even though the Governor appoints the Department Cabinet Secretary, the Cabinet Secretary has decision-making authority, the power to designate management, the responsibility to significantly influence operations and is primarily accountable for fiscal matters.

The Department is part of the primary government of the State of New Mexico, and its financial data is included with the financial data in the State of New Mexico's Comprehensive Annual Financial Report. These financial statements present financial information that is attributable to the Department and does not purport to present the financial position of the State of New Mexico.

2) Summary of Significant Accounting Policies

Financial Reporting Entity

The financial statements for the Department have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP), as applied to governmental units as prescribed by the Governmental Accounting Standards Board (GASB), which is the standard-setting body for governmental accounting and financial reporting. The GASB periodically updates its codification of the existing Governmental Accounting and Financial Reporting Standards, which, along with subsequent GASB pronouncements (Statements and Interpretations), constitutes GAAP for governmental units.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Government-Wide and Fund Financial Statements

The basic financial statements include both government-wide (based on the Department as a whole) and fund financial statements. The reporting model focus is on either the Department as a whole or major individual fund (within the fund financial statements). Both the government-wide and fund financial statements (within the basic financial statements) categorize primary activities as governmental activities. In the Government-Wide Statement of Net Position, the governmental activities column is presented on a consolidated basis by column, and is reflected on a full accrual, economic resources basis, which incorporates long-term assets and receivables as well as long-term debt and obligations.

The government-wide Statement of Activities reflects both the gross and net cost according to functional category, which are otherwise being supported by general government revenues. The Statement of Activities reduces gross expenses (including depreciation) by related program revenues, operating and capital grants. The program revenues must be directly associated with the function. Inter-fund balances have been eliminated in the government-wide financial statements.

The net cost (by function) is normally covered by general revenues (intergovernmental revenues, interest income, etc.).

This government-wide focus is more on the sustainability of the Department as an entity and the change in aggregate financial position resulting from the activities of the fiscal period.

The governmental fund statements are presented on a current financial resource and modified accrual basis of accounting. This presentation is deemed appropriate to (1) demonstrate legal compliance, (2) demonstrate the source and use of liquid resources, and (3) demonstrate how the Department's actual experience conforms to the budget or fiscal plan. Since the governmental fund statements are presented on a different measurement focus and basis of accounting than the government-wide statements' governmental column, a reconciliation is presented on the page following each statement, which briefly explains the adjustment necessary to transform the fund based financial statements into the governmental column on the government-wide presentation.

The Department's fiduciary funds (agency funds) are presented in the fund financial statements. Since by definition these assets are being held for the benefit of a third party and cannot be used to address activities or obligations of the government, these funds are not incorporated in the government-wide statements.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

When an expense is incurred for purposes for which both restricted and unrestricted net positions are available, the Department first uses restricted resources, then unrestricted resources.

Basis of Presentation – Fund Accounting

The accounts of the Department are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund balance, revenues and expenditures. The various funds are summarized by type in the accompanying financial statements. The following fund types are used by the Department:

Governmental Funds—All governmental fund types are accounted for on a spending or financial flow measurement focus. Only current assets and current liabilities are generally included on their balance sheets. Their reported fund balance (net current assets) is considered a measure of available spendable resources. Governmental fund operating statements present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Accordingly, they are said to present a summary of sources and uses of available spendable resources during a period.

Due to their spending measurement focus, expenditure recognition for governmental fund types is limited to exclude amounts represented by noncurrent liabilities. Since they do not affect net current assets, such long-term amounts are not recognized as governmental fund type expenditures or fund liabilities.

The major governmental funds presented in these financial statements include the General Fund, the Emergency Fire Disaster Fund, the State Parks Fund, the Oil Reclamation Fund, the Abandoned Mine Reclamation Fund, the Youth Conservation Corps Fund, the Debt Service Fund, and the Capital Projects GGRT Fund.

General Fund —The General Fund (19900) is the operating fund of the Department. It is used to account for all operating activities of the Department, except those requiring other governmental fund types. It is funded primarily through the State of New Mexico Appropriations Act. This is a major fund. Included in the General Fund are:

- Energy Efficiency reverting
- Forestry reverting
- Mine Reclamation Program reverting
- Voluntary Compliance (Oil & Gas Conservation) reverting
- Program Support reverting

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Additional funds administered by the Department that do not qualify as a special revenue fund and are included in the General Fund is the Boat Suspense Fund (77300), a nonreverting fund established by 66-12-6.1(H) NMSA 1978. This fund collects the excise tax imposed upon the sale of every boat required to be registered in the state. At the end of each month, 50% of the tax is transferred to the State Parks Fund, a major governmental fund, and the balance is transferred to the State General Fund. As of year-end June 30,2018, all balances were transferred to the appropriate funds, resulting in no year-end balances.

<u>Special Revenue Funds</u>—Special Revenue Funds are used to account for the proceeds of specific revenue sources that are legally restricted to expenditures for specific purposes.

Energy Conservation and Management Division

Petroleum Violation Escrow Fund (31600)—Stripper Well – Petroleum Violation Escrow Fund (nonreverting) was established to account for the State of New Mexico's proportionate share of the Petroleum Violation Escrow Funds (oil overcharge monies) pursuant to the 1983 Further Continuing Appropriations Act, Public Law No. 970-377, enacted on December 20, 1982. Funds received are to be utilized for the purpose of funding energy conservation projects in public and nonpublic schools and hospitals in New Mexico, for promoting the introduction of solar energy measures to residential buildings through reduction of interest rates charged by banks, and for demonstrating and promoting energy conservation technology to residences and small businesses. The Department has special revenue funds for the following petroleum violation escrow account: Stripper Well.

Energy Efficiency Assessment Revolving Fund (20150)—The Energy Efficiency Assessment Revolving Fund (nonreverting) was established in accordance with Section 6, Chapter 171, Laws of 2007. The fund consists of appropriations, gifts, grants, donations and bequests made to the fund and reimbursements of costs incurred by the Department in performing energy efficiency assessments pursuant to the Energy Efficiency and Renewable Energy Bond Act. Income from the fund is credited to the fund and money in the fund at year-end is not revertible and nontransferable to any other fund.

Oil Conservation Division

Oil Reclamation Fund (31100)—The Oil Reclamation Fund (nonreverting), established in accordance with Section 70-2-37, NMSA, 1978 Compilation, provides funds for the plugging of dry and abandoned oil wells. The fund was originally allocated a percentage of the oil conservation tax. The tax revenues are used to award performance contracts to independent contractors. In fiscal year

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

2017, this fund was presented as a major fund and in fiscal year 2018, this fund is presented as a nonmajor governmental fund.

Water Quality Permit Fees Fund (40120)—The Water Quality Permit Fees Fund was established in accordance with Section 74-6-5, NMSA, 1978 Compilation, to issue water quality permits for the discharge of any water contaminant or for the disposal or reuse of septage or sludge.

Forestry Division

Emergency Fire Disaster Fund (21300)—The Emergency Fire Disaster Fund (reverting) was established in accordance with Section 68-2-18, NMSA, 1978 Compilation, to account for the operations of the State Forestry and Resources Division in the execution of emergency fire suppression. This is funded from the Governor's contingency fund. This is a major fund.

Forest Land Protection Fund (32200)—The Forest Land Protection Fund (nonreverting) was established in accordance with Section 68-2-28, NMSA, 1978 Compilation.

Conservation Planting Revolving Fund (32100)—The Conservation Planting Revolving Fund (nonreverting) was established in accordance with Section 68-2-21, NMSA, 1978 Compilation, to account for the collection and payment to the State's general fund of the proceeds from the sale of tree seedlings to New Mexican landowners for conservation plantings.

Inmate Work Camp Fund (95600)—The Inmate Work Camp Fund (nonreverting) was established in accordance with Section 33-13-1 to 33-13-8, NMSA, 1978 Compilation, to provide inmate labor for natural resource work planned by the forestry division.

State Parks Division

State Parks Fund (20010)—The Parks Fund (nonreverting) was established to account for monies derived from the OPERATION of state park and recreation areas or from governmental gross receipts tax distributions pursuant to Section 70106.38 NMSA 1978 appropriated to the Department. This is a major fund.

Motor Boat Fuel Tax Fund (30900)—The Motor Boat Fuel Tax Fund (nonreverting) was established in accordance with Section 16-2-19.1, NMSA, 1978 Compilation, to account for ongoing financing, construction and maintenance for motor boat facilities throughout the State. Financing is provided through distribution of gasoline taxes.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Mining and Minerals Division

Carlsbad Brine Well Fund (12180)—The Carlsbad Brine Well is a solution mining operation to remove salt located amidst two major roadways, a vital irrigation canal, a trailer park, a church, and a feed store. Fresh water is introduced into the subsurface through a well casing, thereby dissolving the salt. The brine is then trucked to well sites for beneficial use.

On March 11, 2009, the Oil Conservation Division (OCD) recommended to the operator of the Carlsbad Well that they consider shutting down remaining operations above their cavern and submit contingency planning for a possible collapse including discussions with their neighbors. On March 26th and 27th of 2009, a gathering of regulators, technical experts, and industry was held to discuss overall brine well safety during which consensus developed that the brine cavern in Carlsbad had a high probability for collapse.

Beginning in April of 2009, the division has briefed emergency response organizations, local government, the Departments of Transportation and the Environment, along with the public about the situation on numerous occasions. OCD also contracted with a knowledgeable engineering firm to undertake characterization of the brine cavern and install an automated system to detect ground movement. The early warning system became operational on June 23, 2009. In August of 2009, a two-dimensional seismic reflection survey was completed to determine the lateral extents of the cavern.

A local working group was established in November of 2009 which continues to develop a means of mitigating a cavern collapse, refine and monitor the early warning system, and ensure a proper emergency response if the cavern were to fail in the interim. The Carlsbad Brine Well Remediation Authority (the Authority) has since been created.

The New Mexico Legislature established the Authority during the 2017 Legislative Session as an advisory authority to recommend policy and advise the Department on the remediation of the Carlsbad Brine Well. In the 2018 Legislature, the powers and duties of the Authority were expanded to provide that the Authority "shall set policy and regulate, supervise and administer the remediation of the Carlsbad Brine Well." The 2018 Legislature appropriated to the Department a total of \$45,498,800 for a period of three years to plan, design and construct the remediation of the Carlsbad Brine Well.

The board of directors of the Authority consists of eight members who represent state and local entities. These include the Mayor of the City of Carlsbad, the Chair of the Eddy County Board of County Commissioners, the Manager of the

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Carlsbad Irrigation District, the Attorney General and the heads of four state agencies. The Authority is administratively attached to the Department and is a major fund.

Abandoned Mine Reclamation Fund (65600)—The Abandoned Mine Reclamation Fund (nonreverting) was established in accordance with Section 69-25B-4, NMSA, 1978 Compilation, to retain a portion of the reclamation fees collected in an interest-bearing account to be used after August 3, 1992, for abandoned mine and land reclamation projects. In fiscal year 2017, this fund was presented as a major fund and in fiscal year 2018, this fund is presented as a nonmajor governmental fund.

Surface Mining Penalty Fund (32000)—The Surface Mining Penalty Fund (nonreverting) was established in accordance with Section 69-25A-22, NMSA, 1978 Compilation, as an escrow account for penalties assessed under the Surface Mining Act, which are contested by persons charged with violations of the Act. Proposed penalty amounts are deposited to this fund until the penalty case is adjudicated, at which time such amounts are transferred to the Surface Mining Permit Fees Fund or returned to the depositor.

Surface Mining Permit Fees Fund (31900)—The Surface Mining Permit Fees Fund (nonreverting) was established in accordance with Section 69-25A-10, NMSA, 1978 Compilation, to account for fees accompanying applications for surface coal mining and reclamation permits pursuant to the Surface Mining Act. Fees collected are appropriated for expenditures in the General Fund for administration of the Surface Mining Act.

New Mexico Mining Act Fund (56600)—The New Mexico Mining Act Fund (nonreverting) was established in accordance with Section 69-36-1, NMSA, 1978 Compilation, to promote responsible utilization and reclamation of lands affected by exploration, mining or the extraction of minerals that are vital to the welfare of New Mexico.

New Mexico Mining Act Penalty Fund (73100)—The New Mexico Mining Act Penalty Fund (nonreverting) was established in accordance with Section 69-36-19, NMSA, 1993, to establish a fund in order to properly deposit fines and penalties collected according to the act.

Office of the Secretary

Youth Conservation Corps Fund (01400)—The Youth Conservation Corps (YCC) fund (nonreverting) was established in accordance with Section 9-5B-1, NMSA, 1978 Compilation, to provide a process to employ young persons in projects to

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

conserve New Mexico's natural resources and provide community benefits of lasting value. The monies are received according to the Laws of 1994, Chapter 145, which states that, "A distribution pursuant to Section 7-1-6.1 NMSA 1978 shall be made to the Energy, Minerals, and Natural Resources Department in an amount equal to 25% of the net receipts attributable to the governmental gross receipts tax. 40% of the distribution is appropriated to the Department to implement the provisions of the New Mexico Youth Conservation Corps Act, and 60% of the distribution is appropriated to the Department for state park and recreation area capital improvements, including the costs of planning, engineering, design, construction, renovation, repair, equipment and furnishings." This is a major fund.

<u>Capital Projects Funds</u>—Capital Projects Funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Park and Recreation Division

Capital Projects (64600)—The Capital Projects – GGRT Fund (nonreverting) was established by law to account for financing resources to be used for improving roads; purchasing equipment; and developing, improving and acquiring capital facilities. This fund is financed by governmental gross receipts taxes and federal funds. This is a major fund.

Capital Projects GF/STB (50900)—The Capital Projects Fund (nonreverting) was established to account for financing resources to be used for the acquisition of capital assets as outlined by state law. The fund was created pursuant to Laws of 1995 and is funded primarily by state general fund appropriations and debt issuances of severance tax bonds.

Capital Projects Fund (89200)—The Capital Projects Fund was established to track severance tax funded capital projects that were appropriated in Laws of 2010 and future years.

General Fund Capital Outlay (93100)—The General Fund Capital Outlay fund (nonreverting) was established to account for upgrades and infrastructure improvements at state parks. The fund was created pursuant to Laws of 2015 and funded with a general fund appropriation of \$250,000.

<u>Debt Service Fund (30000)</u>—The Debt Service Fund is used to account for financial resources set aside to meet current and future debt service requirements as required by the 1997A and 1997B Series bond issuances, 1998A and 1998B Series bond issuances, 2001 Series bond issuances, and 2003 Series bond issuance. This is a major fund.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

<u>Fiduciary Funds</u>—Fiduciary Funds include trust and agency funds, which are used to account for assets held by the Department in the capacity of trustee or agent for individuals, private organizations, other governmental entities and/or other funds.

These funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations. During fiscal year ended June 30, 2018, the Department did not have any fiduciary funds.

The following funds did not have activity to report during fiscal year ended June 30, 2018.

- Water Quality Suspense Fund (Fund 40110)
- Boat Suspense Fund (Fund 77300)
- ARRA (Fund 89000)
- Governmental Gross Receipts Tax Suspense (Fund 77400)
- Oil Disposition Holding (Fund 89100)

Basis of Accounting

The government-wide financial statements are reported using the economic resources measurement focus. The government-wide financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place. Nonexchange transactions, in which the Department gives (or receives) value without directly receiving (or giving) equal value in exchange, include gross receipts taxes, grants and appropriations. On an accrual basis, revenue from gross receipts taxes is recognized in the fiscal year for which the taxes are collected. Revenue from grants and appropriations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Amounts reported as program revenues include: 1) charges to customers or applicants for goods, services or privileges provided; 2) operating grants and contributions; and 3) capital grants and contributions. Internally dedicated resources are reported as general revenues rather than program revenues. Likewise, general revenues include all taxes.

Governmental fund types follow the modified accrual basis of accounting for financial statement purposes. Under the modified accrual basis of accounting, revenues and other governmental fund financial resource increments are recognized in the accounting period in which they become susceptible to accrual—that is, when they become both measurable and available to finance expenditures of the fiscal period (available meaning collectible within the current period or soon enough thereafter to be used to pay liabilities of the current period, typically 60 days).

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Revenues from grants that are restricted for specific uses are recognized as revenues and as receivables when the related costs are incurred. Interest earned is accrued currently by the appropriate funds. Contributions, gross receipts tax and other monies held by other state and local agencies are recorded as a receivable at the time the money is made available to the specific fund. All other revenues are recognized when they are received and are not susceptible to accrual.

Expenditures, other than vacation, compensatory and sick pay, are recorded when they are incurred. Expenditures charged to federal programs are recorded utilizing the cost principles prescribed or permitted by the various funding sources. Interest expense is recognized when paid.

Budgets and Budgetary Accounting

Single Year Budget

The following are the procedures followed in establishing the budgetary data presented in the financial statements:

The Department submits a proposed budget to the New Mexico State Legislature for the fiscal year commencing the following July 1. The State Legislature must approve the budget prior to its legal enactment. The expenditures and encumbrances of each category may not legally exceed the budget for that category. Budgets are controlled at the "category" level within activities (personnel services, employee benefits, etc.). The legal level of budgetary control is at the appropriation program level.

Any adjustment to the budget must be submitted to and approved by State Budget Division in the form of a budget adjustment request.

The budget is adopted on the modified accrual basis of accounting, according to statute Chapter 114, Section 3; however, accounts payable that are not recorded in a timely manner (before the statutory fiscal year-end deadline) will not be paid from the current year appropriation, and they are thus not recorded as a budgetary expenditure. Instead, they must be paid out of the next year's budget. This budgetary basis is not consistent with generally accepted accounting principles (GAAP).

It is effective for fiscal years beginning July 1, 2004. Balances remaining at the end of the fiscal year from appropriations made from the State General Fund shall revert to the appropriate fund, unless otherwise indicated in the appropriations act or otherwise provided by law.

Most appropriations made to the Department lapse at year-end and revert to the original funding source. Pursuant to the General Appropriation Act of 2006 (Laws of 2006,

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Chapter 114, Section 3.M), the budgetary basis was converted to the modified accrual basis of accounting, i.e. GAAP basis, beginning with fiscal year 2006 appropriations.

Multi-Year Budget

Each year the Legislature approves multiple year appropriations, which the State considers as continuing appropriations. The Legislature authorizes these appropriations for two to five years; however, it does not identify the authorized amount by fiscal year. Consequently, the appropriation is budgeted in its entirety the first year the Legislature authorizes it. The unexpended portion of the budget is carried forward as the next year's beginning budget balance until either the project period has expired or the appropriation has been fully expended. The budget presentations in these financial statements are consistent with this budgeting methodology.

The Abandoned Mine Reclamation Fund, a major special revenue fund, does not have a legally adopted budget.

Modified Accrual

In applying the "susceptible to accrual" concept to intergovernmental revenues pursuant to Governmental Accounting Standards Board Statement No. 33 (GASB 33), Accounting and Financial Reporting for Nonexchange Transactions, the provider should recognize liabilities and expenses and the recipient should recognize receivables and revenues when the applicable eligibility requirements, including time requirements, are met.

Cash and Cash Equivalents

Cash and cash equivalents are considered to be cash on hand, demand deposits and all highly liquid investment instruments with original state maturities of three months or less.

<u>Investments in State Treasurer General Fund Investment Pool/Deficiency in State General Fund Investment Pool</u>

Investments consists of investments with the New Mexico State Treasurer's Office State General Fund Investment Pool. A Schedule of State General Fund Investment Pool and Bank Accounts with the State Treasurer is included in the Other Supplementary Information section of the report.

Federal Grants Receivable

Various reimbursement procedures are used for federal awards received by the Department. Consequently, timing differences between expenditures and program reimbursements can exist at any time during the fiscal year. Receivable balances at fiscal year-end represent an excess of modified accrual basis expenditures over cash reimbursements received to date. Generally, receivables caused by differences in the

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

timing of cash reimbursements and expenditures will be reversed in the remaining grant period.

Interfund and Interagency Transactions

During the year, the Department makes various transfers of monies to fund debt service payments, capital projects and to reimburse the General Fund for costs incurred on behalf of other funds. Transfers which, because of budgetary or legal restrictions, must be expended by funds other than the fund initially receiving the revenue, are recorded as operating transfers in (out) under the other financing sources (uses) category. These transactions are eliminated in the statement of activities.

Capital Assets

Capital assets are recorded at historical cost and depreciated over their estimated useful lives (with no salvage value). Donated capital assets are recorded at their estimated fair value at the date of donation. Additions, improvements and other capital outlays exceeding \$5,000 that significantly extend the useful life of an asset are capitalized according to Section 12-6-10 NMSA 1978. Other costs incurred for repairs and maintenance are expensed as incurred.

Estimated useful life is management's estimate of how long the asset is expected to meet service demands. Straight-line depreciation is used based on the following estimated useful lives in years:

Intangibles	5 years
Land improvements	20 years
Buildings and improvements	25 years
Furniture and fixtures	5-10 years
Vehicles and automotive	5 years
Equipment and machinery	3-10 years
Data processing equipment	3-5 years

The Department capitalizes computer software, whether purchased or developed internally, in accordance with guidelines provided by the GSD Rule NMAC Chapter 20, Part 1, Sections 2.20.1.9C(5) and 2.20.1.10C, and FASB 86 accounting principles. Library and museum acquisitions are considered inexhaustible assets and therefore are not depreciated.

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

(expense/expenditure) until then. The Department did not have any items that qualified for reporting in this category as of June 30, 2018.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period and so will not be recognized as an inflow of resources (revenue) until that time. The Department did not have any items that were required to be reported in this category as of June 30, 2018.

Compensated Absences

Vacation, compensatory and sick time is reported as a liability in the government-wide financial statements, with expenses being reported during the period that leave is accrued. The fund financial statements report expenditures during the period that employees are actually paid, or when compensated absences are liquidated with expendable financial resources from the operational portion of state general fund appropriations. Employees are entitled to accumulate annual leave at a graduated rate based on years of service. Accrued vacation up to 240 hours is recorded in the Statement of Net Position at 100% of the employee's hourly wage. In addition, accrued sick leave over 600 and up to 720 hours less the amount classified as current is recorded in the Statement of Net Position at 50% of the employee's hourly wage. Compensatory time is accrued at a rate of one and onehalf hours for each hour of employment for which overtime compensation is required for those employees covered by the Fair Labor Standards Act (FLSA). Employees exempt from coverage by FLSA earn one hour of compensatory time for each overtime hour. The accrual for compensated absences is calculated at pay rates in effect at June 30, 2018, and includes direct and incremental salary related payments, such as the employees' share of social security taxes.

Reversions

Section 6-5-10 NMSA 1978 requires that all unreserved undesignated fund balances in reverting funds and accounts as of June 30, shall revert by September 30, to the general fund. Historically, the Department of Finance and Administration's (DFA) Year-End Deadlines policy (commonly referred to as 'closing instructions') required state agencies to record reversions to the state general fund not settled by June 30, to the "Due to State General Fund" liability account (234900) as of June 30, of each fiscal year end. The historical policy required state agencies to execute a transfer in the subsequent fiscal year to relieve the amount "Due to State General Fund" and reduce the agency's "Investment in State General Fund Investment Pool."

Pursuant to DFA's addenda to accounting policy statement four – custodial funds dated July 14, 2017, DFA adopted a change of accounting policy applicable to all state agencies in fiscal year 2017 for amounts reverted to the state general fund. Under the new policy,

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

DFA requires state agency reversions to the state general fund to be accounted for as both a reversion and a reduction in the reverting agency's "Investment in State General Fund Investment Pool" as of June 30, using the State's adjustment period, if the entry was processed by September 30, 2017. In accordance with the new policy, no "Due to State General Fund" liability is reported in the Department's financial statements as of June 30, 2018, because the Department's "Investment in State General Fund Investment Pool" balance has been reduced by the amount reverted to the state general fund.

Risk Management

The Department, as a "State Agency" defined in the New Mexico Tort Claims Act, is insured through the Risk Management Division of the State of New Mexico. The Department pays annual premiums to the Risk Management Division for various coverages. Please refer to Note 19 for additional information.

Net Position

The government-wide statements utilize a net position presentation categorized as follows:

<u>Net investment in capital assets</u>—This category reflects the portion of net position that are associated with capital assets less outstanding capital asset related debt.

<u>Restricted net position</u>—For the government-wide statement of net position, net position is reported as restricted when constraints placed on net position used are imposed by law through constitutional provisions or enabling legislation.

<u>Unrestricted net position</u>—This category reflects net position of the District not restricted for any project or other purpose.

Fund Balances

In the governmental fund financial statements, fund balances are classified as nonspendable, restricted, committed, assigned or unassigned. Restricted represents those portions of fund balance where constraints placed on the resources are either externally imposed or imposed by law through constitutional provisions or enabling legislation. Committed fund balance represents amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislative and Executive branches of the State. Assigned fund balance is constrained by the Legislature's and Executive Branch's intent to be used for specific purposes or, in some cases, by legislation. See Note 21 for additional information about fund balances.

When an expenditure/expense is incurred for purposes for which both restricted and unrestricted resources are available, it is the State's policy to use restricted resources first. When expenditures/expenses are incurred for purposes for which unrestricted (committed, assigned and unassigned) resources are available, and amounts in any of

Notes to Financial Statements June 30, 2018

these unrestricted classifications could be used, it is the State's policy to spend committed resources first.

3) PVE Fund Grant Expenditures

Various grant programs allocate expenditures to the Petroleum Violation Escrow (PVE) accounts included as cost centers in the General Fund and as Special Revenue Funds. These expenditures are included in the General Fund and within the Combined Special Revenue Funds. However, these expenditures have not been included within the accompanying Supplemental schedule of expenditures of federal awards because of the unique nature of these funds. Revenues included in the PVE Funds are derived from interest earned on deposits with the state treasurer recorded as other state funds and federal draw-downs from the U.S. Department of Energy. During the current fiscal year, the PVE accounts did not incur any expenditures.

4) State General Fund Investment Pool

Compliant with statute 6-10-3 (NMSA 1978), and to optimize state cash management and investment practices, funds of various state agencies are deposited in the State General Fund Investment Pool (SGFIP). This pool is managed by the New Mexico State Treasurer's Office (STO). Claims on the SGFIP are reported as financial assets by the various agencies investing in the SGFIP.

Agency claims against the SGFIP and fiduciary resources held at STO to fulfill those claims were not reconciled from the inception of SHARE (the State's centralized accounting system), in July 2006 through January 2013, which caused uncertainty as to the validity of the claims and the ability of fiduciary resources to fulfill those claims. As a result of business process and systems configuration changes made during the Cash Management Remediation Project Phase I, the Department of Finance and Administration's Financial Control division began reconciling transactional activity reported by the State's fiscal agent bank to the SHARE general ledger on a point-forward basis beginning February 1, 2013. In March 2015, the Financial Control Division implemented a reconciliation process that compares statewide agency claims against the resources held in the SGFIP at STO. This process is known as the claims to resources reconciliation.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

The State Controller indicated on August 11, 2017, that resources held in the pool were equivalent to the corresponding business unit claims on those resources and that all claims as recorded in SHARE shall be honored at face value.

The Department has established daily and monthly procedures that mitigate the risk of misstatement of the Department's balances within the Pool.

5) Interest in the State General Fund Investment Pool

State law (Section 8-6-3 NMSA 1978) requires the Department's cash be managed by the New Mexico State Treasurer's Office. Accordingly, the investments of the Department consist of an interest in the State General Fund Investment Pool managed by the New Mexico State Treasurer's Office.

At June 30, 2018, the Department had the following invested in the State General Fund Investment Pool:

Governmental funds - state general fund investment pool \$ 40,387,297

Interest Rate Risk

The New Mexico State Treasurer's Office has an investment policy that limits investment maturities to five years or less on allowable investments. This policy is a means of managing exposure to fair value losses arising from increasing interest rates. This policy is reviewed and approved annually by the New Mexico State Board of Finance.

Credit Risk

The New Mexico State Treasurer pools are not rated.

For additional GASBS No. 40 and GASBS No. 72 disclosure information regarding cash held by the New Mexico State Treasurer, the reader should see the separate audit report for the New Mexico State Treasurer's Office for the fiscal year ended June 30, 2018.

The state treasurer issues separate financial statements, which disclose the collateral pledged to secure these deposits, categories of risk involved and the market value of purchased investments, which may differ from the cash deposited by the Department (refer to Schedule 1 – Schedule of State Government Fund Investment Pool and Bank Accounts.)

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

6) Cash and Cash Equivalents and Restricted Cash

The Department utilizes bank accounts to deposit revenue from its various locations in order to transfer the funds into its accounts with the state treasurer. The Department's cash is held by agents of the Department in the Department's name. Monies held in restricted cash are the reserves required for the Debt Service Fund.

		I	Balances
			June 30,

Governmental funds cash and cash equivalents		\$	585,330

Custodial credit risk is the risk that in the event of the failure of a counterparty, the Nation will not be able to recover the value of its bank deposits. Deposits are exposed to custodial credit risk if they are uninsured and uncollateralized. The Department's formal policy relating to custodial credit risk on its deposits requires that all funds are collateralized at a minimum level of 50%.

At June 30, 2018, the carrying amount of the Department's deposits was \$73,573 and the bank balances were \$43,564 and cash on hand of \$17,045. As of June 30, 2018, all of the Department's deposits were fully collateralized.

In accordance with Senate Bill 320, the Department was required to transfer the real property of the Vietnam Veterans' Memorial State Park in Colfax county to the General Services Department. Upon ratification of the transfer of the real property from the Department to the General Services Department, all programs, functions, personnel, appropriations, money, records, furniture, equipment, supplies, and other property belonging to the Department pertaining to Vietnam Veterans' Memorial State Park in Colfax county was transferred to the New Mexico Department of Veterans' Services. The

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

total amount of property, plant and equipment transferred on January 1, 2018 from the Department, was \$2,794,948, less accumulated depreciation of \$1,025,090 for a net value of \$1,769,858.

As allowed by NMSA 16-2-15, on June 21, 2018, the Department and New Mexico Department of Game and Fish signed a quitclaim deed to transfer the Mesilla Valley State Park property and assets related to the park from the Department State Parks to the New Mexico Department of Game and Fish. This resulted in a transfer of buildings, equipment, land and land improvements for a total amount of \$3,935,984, less accumulated depreciation of \$1,415,033 for a net value of \$2,520,951. There is currently pending litigation related to this quitclaim deed and the transfer of this park. As of the date of financial statement issuance, there litigation has not been resolved.

Depreciation expense was charged to governmental function as follows:

Renewable energy program	\$ 2,655,852
State parks program	1,483,941
Fire disasters	867,285
Conservation	472,696
Oil and gas conservation program	383,567
Mine reclamation program	53,061
Healthy forests program	 33,755
Total	\$ 5,950,157

8) Reversion of Funds

In accordance with statute Section 6-5-10(A) NMSA 1978, unrestricted fund balances in reverting funds and accounts as reflected in the central accounting system as of June 30 shall revert. A total of \$3,726,363 was payable at June 30, 2018, to the state general fund and due by September 30, 2018. This payable may be adjusted within 45 days of the release of this audit by the New Mexico Office of the state auditor.

Notes to Financial Statements June 30, 2018

		Fiscal
		Year of
	Reversion	Appropriation
	 Amount	or Collection
General Fund Appropriation	\$ 49,933	2018
Special Revenue Fund - Emergency Fire Disaster	 3,676,430	2018
Total governmental funds	\$ 3,726,363	

Of these reversion amounts due to the State General Fund for the year ended June 30, 2018, \$3,726,363 was paid prior to September 30, 2018.

9) Long-Term Debt

The changes to long-term debt are as follows:

		Balance					Balance	Amount Due Within
	Ju	ne 30, 2017		Increase	(Decrease)	Jı	ine 30, 2018	One Year
Compensated absences	\$	1,495,150	\$	2,238,252	\$ (2,095,588)	\$	1,637,814	\$ 1,637,814
Bonds issued, 2003		2,808,445	_	-	 (421,553)	_	2,386,892	 438,627
Net total	\$	4,303,595	\$	2,238,252	\$ (2,517,141)	\$	4,024,706	\$ 2,076,441

Typically, the General Fund has been used to liquidate other long-term liabilities.

During the 2004 fiscal year, Parks and Recreation Division issued series 2003 Series bonds. These bonds were issued in accordance with 16-2-21 NMSA 1978, "State Park and Recreation Bond Act." These bonds were issued to provide for the acquiring, developing, operating and maintaining of state parks and recreation areas. The 2003 Series was issued for \$7,338,915 with issuance costs of \$82,032. Parks and Recreation Division's share of governmental gross receipts tax is pledged to repay these bonds. Interest rate on the 2003 Series bonds is 3.823%. The issuances require a reserve of \$541,514 to be maintained in the debt service fund. Interest expense for the current fiscal year was \$112,699. The current portion of long-term debt is \$438,627.

Notes to Financial Statements June 30, 2018

Maturities of the bond issuances for the next five years and thereafter are as follows:

Year Ended June 30,	Principal	Interest	Total		
2019	\$ 438,627	\$ 96,721	\$	535,348	
2020	456,832	79,658		536,490	
2021	476,158	61,522		537,680	
2022	496,732	42,190		538,922	
2023	 518,543	21,675		540,218	
Total	\$ 2,386,892	\$ 301,766	\$	2,688,658	

10) Due From and Due to Other Funds

Due from and due to other funds as of June 30, 2018, are as follows:

		Oue from
		Debt
Due to	Sen	rvice Fund
Capital Projects GGRT	\$	535,622
Total	\$	535,622

The due from/due to other funds arise when transactions occur in one fund that are partially attributable to another fund or funds. In this case, the capital projects GGRT fund covers the loan payment to the New Mexico Finance Authority for the State Park infrastructure loan and the debt service fund reimburses the capital projects GGRT fund. Typically, the debt service fund will reimburse the capital project GGRT prior to year-end, resulting in no due from/due to year-end balance between the funds. In fiscal year 2018, the Department inadvertently missed the budget deadline to move funds and therefore, a due from/due to is presented to reflect this. All balances are expected to be paid within one year.

Notes to Financial Statements June 30, 2018

11) Due to and Due From Other State Agencies

Due to and due from other state agencies represent interagency receivables and payables arising from interagency transactions. As of June 30, 2018, there were no Due To Other State Agencies. Due From other state agencies as of June 30, 2018, were as follows:

Due from Other	Fund			Due from	Fund	
State Agencies	No.		Amount	Agency/Fund	No.	 Amount
Capital Projects-GGRT	64600	\$	531,076	Taxation and Revenue Department	83200	\$ 531,076
Youth Conservation Corps	1400		379,393	Taxation and Revenue Department	83200	379,393
State Parks	20010		548	Taxation and Revenue Department	82800	548
Nonmajor Governmental Funds						
Oil Reclamation Fund	31100		543,308	Taxation and Revenue Department	83300	543,308
Motor Boat Fuel Tax Fund	30900		16,099	Taxation and Revenue Department	82800	 16,099
Total governmental funds			1,470,424	Total governmental funds		 1,470,424
Total all funds		\$	1,470,424	Total all funds		\$ 1,470,424

12) Due to Federal Governments

Due to federal governments as of June 30, 2018, were as follows:

Due to Federal Government	Fund No.	 Amount	Due to Federal Government	Amount		
Governmental funds			Federal Agency			
Emergency Fire Disaster	21300	\$ 1,381,556	USDA Forest Service	\$	1,381,556	
Total due to federal governments		\$ 1,381,556	Total due to federal governments	\$	1,381,556	

The due to federal governments arises when a fire is considered Level 1. During the course of the fire, the federal agency will cover the costs. After the fire has been extinguished, the federal agency will determine the amount of expenses incurred and will bill the Department for their portion of the expenses. The amount due will be paid by Department within the following fiscal year.

Notes to Financial Statements June 30, 2018

13) Transfers

Interfund and interagency transfers as of June 30, 2018, were as follows:

A - Intra-agency Transfers		Transf					
		State	Go	vernmental			
Transfer in	I	Parks Fund		Funds	Totals		
General Fund	\$	304,077	\$	235,409	\$	539,486

52200	01400	Youth Conservation Corps	19900	 125,000
				\$ 25,312,779

14) Special Appropriations and Governor's Executive Orders

The Governor issued executive orders during the 2018 fiscal year to fund the Emergency Fire Disaster Program (Fund 21300). Any unexpended or unencumbered amounts revert in the subsequent fiscal year. The Department requested and received \$13,500,000 during the 2018 fiscal year.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

15) Pension Plan – Public Employees Retirement Association

Compliant with the requirements of Government Accounting Standards Board Statement No. 68, *Accounting and Financial Reporting for Pensions*, the State of New Mexico has implemented the standard since fiscal year ending June 30, 2015.

The Department, as part of the primary government of the State of New Mexico, is a contributing employer to a cost-sharing multiple employer defined benefit pension plan administered by the Public Employees Retirement Association (PERA). Disclosure requirements for governmental funds apply to the primary government as a whole, and as such, this information will be presented in the Comprehensive Annual Financial Report (CAFR) of the State of New Mexico.

Information concerning the net pension liability, pension expense, and pension-related deferred inflows and outflows of resources off the primary government will be contained in the CAFR and will be on the Department of Finance and Administration's home page or at http://www.nmdfa.state.nm.us/audit-info.aspx.

16) Post-Employment Benefits – State Retiree Health Care Plan

Plan Description. The Department contributes to the New Mexico Retiree Health Care Fund, a cost-sharing multiple-employer defined benefit postemployment healthcare plan administered by the New Mexico Retiree Health Care Authority (NMRHCA). The NMRHCA provides health care insurance and prescription drug benefits to retired employees of participating New Mexico government agencies, their spouses or domestic partners, dependent children under the age of 26, surviving spouses and dependents. The NMRHCA Board was established by the Retiree Health Care Act (Chapter 10, Article 7C, NMSA 1978). The Board is responsible for establishing and amending benefit provisions of the healthcare plan and is also authorized to designate optional and/or voluntary benefits like dental, vision, supplemental life insurance, and long-term care policies.

Eligible retirees are: 1) retirees who make contributions to the fund for at least five years prior to retirement and whose eligible employer during that period of time made contributions as a participant in the NMRHCA plan on the person's behalf unless that person retires before the employer's NMRHCA effective date, in which the event the time period required for employee and employer contributions shall become the period of time between the employer's effective date and the date of retirement; 2) retirees defined by the Act who retired prior to July 1, 1990; 3) former legislators who served at least two years; and 4) former governing authority members who served at least four years.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

The NMRHCA issues a publicly available stand-alone financial report that includes financial statements and required supplementary information for the postemployment healthcare plan. That report and further information can be obtained by writing to the Retiree Health Care Authority at 4308 Carlisle NE, Suite 104, Albuquerque, NM 87107.

Funding Policy. The Retiree Health Care Act (Section 10-7C-13 NMSA 1978) authorizes the NMRHCA Board to establish the monthly premium contributions that retirees are required to pay for healthcare benefits. Each participating retiree pays a monthly premium according to a service based subsidy rate schedule for the medical plus basic life plan plus an additional participation fee of five dollars if the eligible participant retired prior to the employer's NMRHCA effective date or is a former legislator or former governing authority member. Former legislators and governing authority members are required to pay 100% of the insurance premium to cover their claims and the administrative expenses of the plan. The monthly premium rate schedule can be obtained from the NMRHCA or viewed on their website at www.nmrhca.state.nm.us.

The state employee and employer share of contributions are deposited to NMRHCA after each bi-weekly payroll whereas retiree contributions are required to be remitted to NMRHCA on a monthly basis. The statutory requirements for the employer and employee contributions can be changed by the New Mexico State Legislature, Employers that choose to become participating employers after January 1, 1998, are required to make contributions to the NMRHCA fund in the amount determined to be appropriate by the board.

The Retiree Health Care Act (Section 10-7C-15 NMSA 1978) is the statutory authority that establishes the required contributions of participating employers and their employees. For employees that were not members of an enhanced retirement plan (state police and adult correctional officer member coverage plan 1; municipal police member coverage plans 3, 4 or 5; municipal fire member coverage plan 3,4 or 5; municipal detention officer member coverage plan 1; and members pursuant to the Judicial Retirement Act) during the fiscal year ended June 30, 2016, the statute required each participating employer to contribute 2.0% of each participating employee's annual salary; and each participating employee was required to contribute 1.0% of their salary. There is a higher contribution rate applies to members under an enhanced PERA retirement plan. In addition, pursuant to Section 10-7C-15(G) NMSA 1978, at the first session of the Legislature following July 1, 2016, the Legislature shall review and adjust the distributions pursuant to Section 7-1-6.1 NMSA 1978 and the employer and employee contributions to the authority in order to ensure the actuarial soundness of the benefits provided under the Retiree Health Care Act.

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

The Department's contributions to the NMRHCA for the years ended June 30, 2018, 2017, and 2016, were \$358,120, \$369,305, and \$384,744, respectively, which equal the required contributions for each year.

Compliant with the requirements of the Government Accounting Standards Board Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions, the State of New Mexico has implemented this standard for the fiscal year ended June 30, 2018.

The Department, as part of the primary government of the State of New Mexico, is a contributing employer to a cost-sharing multiple-employer defined benefit postemployment health care plan that provides a comprehensive group health insurance for persons who have retired from certain public service positions in New Mexico. The Other Postemployment Benefits (OPEB) Plan is administered by the Retiree Health Care Authority of the State of New Mexico. Overall, total OPEB liability exceeds OPEB Plan net position resulting in a net OPEB liability. The State has determined the State's share of the net OPEB liability to be a liability of the State as a whole, rather than any agency or department of the State and the liability will not be reported in the department or agency level financial statements of the State. All required disclosures will be presented in the Comprehensive Annual Financial Report (CAFR) of the State of New Mexico.

Information concerning the net liability, benefit expense, and benefit-related deferred inflows and deferred outflows of resources of the primary government will be contained in the State of New Mexico Comprehensive Annual Report (CAFR) for the year ended June 30, 2018 and will be available, when issued, from the Office of the State Controller, Room 166, Bataan Memorial Building, 407 Galisteo, Santa Fe, New Mexico, 87501.

17) Operating Lease Commitment

The Department leases certain equipment and premises under numerous operating leases. Leases are subject to future appropriation and as such are cancelable by the Department at the end of a fiscal year. Rental expense for the year ended June 30, 2018, was \$255,757.

Notes to Financial Statements June 30, 2018

The following is a schedule by years of future minimum lease payments required under operating leases that have initial or remaining noncancelable terms in excess of one year as of June 30, 2018.

	 Amount
Year ending June 30,	
2019	\$ 105,194
2020	98,734
2021	86,691
2022	27,583
2023	25,084
Thereafter	 9,859
Total	\$ 353,145

18) Leasing Activities

The Department has and maintains operating leases consisting primarily of Departmentowned communication towers leased to nonstate entities. The following schedule presents minimum future rentals receivable from these operating leases:

	<i>_</i>	Amount
Year ending June 30,		
2019	\$	27,987
2020		14,693
2021		15,428
2022		16,199
2023		-
Total	\$	74,307

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

19) Contingent Liabilities (Claims and Judgments)

The Department, as a State Agency defined in the New Mexico Tort Claims Act, is insured through the Risk Management Division of the General Services Department of the State of New Mexico. The Office of Risk Management Division pays annual premiums for coverage provided in the following areas:

- Liability and civil rights protection for claims made by others against the State of New Mexico;
- Coverage to protect the State of New Mexico's property and assets; and
- Fringe benefit coverage for State of New Mexico employees.

In the case of civil actions or claims against the Department for financial damages, the Department's certificate of insurance with Risk Management does not cover claims for back wages but does cover civil rights claims for other compensatory damages.

20) Risk Management

The Department obtains coverage through the Risk Management Division of the State of New Mexico General Services Department. This coverage includes public liability, property, workers compensation, surety bond unemployment compensation and group health insurance. These coverages are designed to satisfy the requirements of the State Tort Claims Act. The maximum limits provided by the Tort Claims Act are \$1,050,000 per occurrence.

The Department had no significant reductions in insurance coverage from coverage in the prior year. In the fiscal years ended June 30, 2018, 2016, and 2015, there were no settlements that exceeded insurance coverage.

21) Fund Balance Restrictions

According to GASB 54, Fund Balance Reporting and Governmental Fund Type Definitions, the following are the fund balance classifications. The Department's fund balances represent: 1) Restricted purposes, which include balances that are legally restricted for specific purposes due to constraints that are externally imposed by creditors, grantors, contributors, or laws or regulations of other governments, 2) Committed purposes, which include balances that can only be used for specific purposes pursuant to constraints imposed by formal action of the Legislative and Executive branches; 3)

Energy, Mineral, and Natural Resources Department

Notes to Financial Statements June 30, 2018

Assigned purposes, which includes balances that are constrained by the government's intent to be used for specific purposes, but are neither restricted nor committed. A summary of the nature and purpose of these reserves by fund type at June 30, 2018, follows:

Fund Name	Restricted	Unassigned	
General Fund			
Unassigned	\$ -	\$	1,173
Emergency Fire Disaster—Fire Disaster	14,767,575		-
Capital Projects - GGRT—Capital Projects Activity	6,989,474		-
State Parks—State Parks Program	6,622,912		-
Abandoned Mine Reclamation—Mine Reclamation Program	4,793,221		-

Surface Mining Permit Fees—Mine Reclamation Program	197,569		-
Energy Efficiency Assessment—Renewable Energy Program	134,216		-
General Fund Capital Outlay—State Parks Program	105,854		-
Conservation Planting Revolving Fund—Healthy Forests Program	89,740		-
New Mexico Mining Act Penalty—Mine Reclamation Program	77,662		-
Debt Service—Debt Service Activity	23,114		-
Forest Land Protection—Healthy Forests Program	20,470		-
Petroleum Violation Escrow-Stripper Well—Renewable Energy Program	12,196		-
Surface Mining Penalty Fund—Mine Reclamation Program	 7,865		
Total	\$ 45,873,729	\$	1,173

22) Commitments and Contingencies

During the 2017 Legislative Session the New Mexico Legislature established an advisory authority to recommend policy and advise the Department on the remediation of the Carlsbad Brine Well. In the 2018 Legislature, the powers and duties of the Authority were expanded to provide that the Authority "shall set policy and regulate, supervise and administer the remediation of the Carlsbad Brine Well." The 2018 Legislature appropriated to the Department a total of \$45,498,800 for a period of three years to plan, design and construct the remediation of the Carlsbad Brine Well. See footnote 2 for further information regarding the Carlsbad Brine Well fund.

Energy, Mineral, and Natural Resources Department

Notes to Required Supplementary Information Year Ended June 30, 2018

1) Budgetary Basis of Accounting

Budgets are not adopted on a basis consistent with GAAP. The annual appropriated budget is legally enacted and provides for a legal level of control at the appropriation program level (A-Code, P-Code, and Z-Code).

FOR Lava Soil and Water Conservation District 11 -521-2301-0028 Open Joint Powers Agreement 10/4/2010 12/31/9999 \$0.00 Kimberly A. Kostelnik

Notes: Improvement of natural resources on lands the SWCD manages through the performance of natural resource restoration projects. This JPA supersedes and terminates SHARE JPA 000 ... 4340 (EMNRD No. 07-521-A060-133-0283). Essential: Direct abatement of wildfire threat. This JPA contains no specific compensation amount, but instead requires the SWCD to complete individual project work plans with specified dollar amounts. A sample work plan is included with the Agreement so the SWCD knows what is expected and to give the Department of Finance and Administration an idea of each plan's format. When each work plan is satisfactory to EMNRD, the State Forester and the SWCD sign off on the plan. EMNRD then forwards each executed plan, the accompanying purchase requisition and a revised JPA brief through the DFA Secretary's Office as per established procedure. Funding for this on-going JPA is provided by the U.S. Department of Agriculture, Forest Service, under the Wildland Urban interface and the Hazardous Fuels Reduction Grant Programs, as well as other funding sources, to mitigate the threat of wildland fires and improve forest health. SHARE No. 000 ... 11996.

FOR Salado Soil and Water Conservation District 11 -521-2301-0029 Open Joint Powers Agreement 8/5/2010 12/31/9999 \$25,000.00 Donald J. Griego

Notes: Improvement of natural resources on lands the SWCD manages through the performance of natural resource restoration projects. Essential: Direct abatement of wildfire threat. Notes: Thinning projects, Essential: Driect abatement of wildfire threat, Supersedes and terminates SHARE JPA 000 ... 2473 (04-521-0494-0080), State and federal funds, SHARE No. 000 ... 12272.

FOR Village of Ruidoso

11 -521-2301-0052

Joint Powers Agreement 10/4/2010 12/31/9999

\$1,663,632.00 Raymond (Eddie) Tudor

Notes: Improvement of natural resources on lands the Village owns through the performance of natural resource restoration projects. This JPA supersedes and terminates SHARE JPA 000 ... 2458 (EMNRD No. 04-521-0486-0053) and SHARE No. 000 ... 5425 (EMNRD No. 04-521-0486-0053, Amd. 1). This JPA contains no specific compensation amount, but instead requires the Village to complete individual project work plans with specified dollar amounts. A sample work plan is included with the Agreement so the Village knows what is expected and to give the Department of Finance and Administration an idea of each plan's format. When each work plan is satisfactory to EMNRD, the State Forester and the Village sign off on the plan. EMNRD then forwards each executed plan, the accompanying purchase requisition and a revised JPA brief through the DFA Secretary's Office as per established procedure. Funding for this on-going JPA is provided by the U.S. Department of Agriculture, Forest Service, under the Wildland Urban interface and the Hazardous Fuels Reduction Grant Programs, as well as other funding sources. SHARE No. 000 ... 12273.

FOR New Mexico Department of Game and Fish

09 -521-0400-0182

Open

Joint Powers Agreement 3/11/2009 12/31/9999

\$0.00 Kimberly A. Kostelnik

Notes: Improvement of natural resources on lands owned by the State Game Commission through the performance of natural resource restoration projects. This JPA contains no specific compensation amount, but instead requires the NMDGF to complete individual project work plans with specified dollar amounts. A sample work plan (Attachment A) is included with the Agreement so NMDGF knows what is expected and also provides a sample format to the Department of Finance and Administration. When each work plan is satisfactory to EMNRD, the State Forester and NMDGF sign off on the plan. EMNRD then forwards each executed plan, the accompanying purchase requisition and a revised JPA brief through the DFA Secretary's Office as per established procedure. Essential: Direct abatement of wildfire threat. SHARE No. 000 .. 9318. Mix of state and federal funds.

FOR Department of Cultural Affairs

Notes to the Schedule of Expenditures of Federal Awards June 30, 2018

1) Basis of Presentation

The accompanying schedule of expenditures of federal awards includes the federal grant activity of the State of New Mexico Energy, Minerals, and Natural Resources Department and is presented on the modified accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance).

2) Summary of Significant Accounting Policies

Expenditures reported on the schedule are reported on the modified accrual basis of accounting. Such expenditures are recognized following the cost principles contained in the Uniform Guidance, wherein certain types of expenditures are not allowable or are limited as to reimbursement. Therefore, some amounts presents in this schedule may differ from amounts presented in, or used in the preparation of, the financial statements.

3) Indirect Cost Rate

The Department has elected to use the 31.74 percent indirect cost rate as approved by the United States Department of Agriculture.

4) Catalog of Federal Domestic Assistance (CFDA) Number

The program titles and CFDA numbers were obtained from the 2018 *Catalog of Federal Domestic Assistance*.

Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and other Matters Based on an Audit of Financial Statements Performed in Accordance with Government Auditing Standards

State of New Mexico Energy, Minerals, and Natural Resources Department and Mr. Wayne Johnson New Mexico State Auditor

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards issued by the Comptroller General of the United States, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information, and the budgetary comparisons for the general fund and major special revenue funds, of the State of New Mexico Energy, Minerals, and Natural Resources Department (the "Department") as of and for the year ended June 30, 2018, and the related notes to the financial statements, which collectively comprise the Department's basic financial statements, and have issued our report thereon dated October 30, 2018.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Department's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Department's internal control. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the Department's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did not identify a deficiency in internal control that we consider to be a significant deficiency. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Department's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*. However, we noted certain other matters that are required to be reported pursuant to Section 12-6-5, NMSA 1978, which are described in the accompanying Section 12-6-5 NMSA 1978 Finding as findings 2016-001, 2018-001.

Department's Response to Findings

The Department's responses to the findings identified in our audit are described in the accompanying Schedule of Findings and Questioned Costs. The Department's responses were not subjected to the auditing procedures applied in the audit of the financial statements and, accordingly, we express no opinion on them.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Albuquerque, New Mexico

October 30, 2018

Independent Auditor's Report On Compliance for Each Major Program and on Internal Control Over Compliance Required by the Uniform Guidance

State of New Mexico Energy, Minerals, and Natural Resources Department and Mr. Wayne Johnson
New Mexico State Auditor

Report on Compliance for Each Major Federal Program

We have audited the State of New Mexico Energy, Minerals, and Natural Resources Department's (the "Department") compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the Department's major federal programs for the year ended June 30, 2018. The Department's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to express an opinion on compliance for each of the Department's major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the audit requirements of *Title 2 U.S. Code of Federal Regulations Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Department's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

F 505.998.3333

F 602.730.3699

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the Department's compliance.

Opinion on Each Major Federal Program

In our opinion, the Department complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2018.

Report on Internal Control Over Compliance

Management of the Department is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the Department's internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Department's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that have not been identified. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Section 12-6-5 NMSA 1978 Findings For the Year Ended June 30, 2018

2016-001 — Use of State Issued Gas Cards (Compliance and Other Matters) (Modified and Repeated)

Criteria: 1.5.4.12 NMAC states that credit cards shall be used only for official business and only to furnish state-owned vehicles with regular gasoline, unleaded gasoline, diesel fuel, etc.

Condition: Even though the Department provided information to the financial staff at the sixmonth training, which outlines the prohibited use of fuel other than regular gas, unleaded gas and diesel fuel this compliance issue continues to be present. The Department has also provided information to its staff associated with the vehicle logs. During our internal control testwork over the use of gas cards, we noted the following:

- For 3 out of 5 transactions reviewed, the transactions were utilized for fuel other than unleaded. The aggregate noncompliance amount was \$142.13.
- For 14 out of 25 transactions the mileage logs utilized by various divisions within the Department were not completed with all applicable information. Such information includes activity, ending mileage, month and day, etc.
- For 1 out of 25 transactions reviewed the transaction per the Vehicle Log could not be found on the WEX report. The aggregate noncompliance amount was \$26.01.

Cause: Lack of adherence to the Department policies and procedures by Department employees who use the fuel cards.

Effect: Noncompliance with New Mexico administrative code.

Auditor's Recommendations: We recommend the Department remind their employees of their policies and procedures pertaining to fuel card usage. In addition, we recommend that the Department utilize a standard mileage log across divisions.

State of New Mexico Energy, Mineral, and Natural Resources Department

Section 12-6-5 NMSA 1978 Findings For the Year Ended June 30, 2018

2016-001 — Use of State Issued Gas Cards (Compliance and Other Matters) (Modified and Repeated) — continued

Management's Response: Management concurs with the finding as stated and have immediately worked to resolve the current findings by revising the current standardized vehicle log that will be enough to meet all the needs of each division of the agency and ensure that the Department follows the management corrective action plan by getting two signatures on the vehicle logs. To ensure all transactions on the gas cards are verified, each division will validate that each transaction has a corresponding receipt and that the proper fuel was used. If no receipt or unauthorized fuel is used the division fleet coordinator will ensure that the driver of the vehicle has submitted a valid justification inducting the reasons for no receipt or the use of an unauthorized fuel type. Once the division fleet coordinators have verified the logs and received the two signatures, the monthly payment can be initiated on the WEX invoice. If a transaction has not been posted to the WEX invoice, the accounts payable division staff will place a note on the invoice indicating that a transaction (receipt) has not posted to the WEX invoice and will contact WEX. Once the verification has been completed, the invoice can be processed in SHARE with the invoice and all related Fleet Logs for the month will be attached to the payment voucher. Additionally, Management has worked to rectify these issues starting in February 2018, the Department revised the vehicle logs for all vehicles to include a statement that only regular unleaded can be used and put a justification column on the log to enter a justification by the driver if other fuel type was used. When vehicle logs are reconciled monthly to WEX invoice if any other fuel type is used and no justification is on vehicle log an email is sent to the manager and driver to obtain a justification. All transactions from WEX to vehicle logs are reconciled to insure completeness. ASD staff also states that only regular unleaded fuel could be used with all state vehicles during our bi-annual training.

Energy, Mineral, and Natural Resources Department

Section 12-6-5 NMSA 1978 Findings — continued For the Year Ended June 30, 2018

2018-001 — Cash Receipts and Deposits (Compliance and Other Matters)

Criteria: The Public Money Act [Chapter 6-10-3 New Mexico Statutes Annotated (NMSA) 1978] requires that all cash received by the Department must be deposited before the close of the next succeeding business day after the receipt of money.

Condition: For 1 out of 25 cash receipts tested, the total amount of cash receipts per the cash remittance report did not agree to the amount deposited within the required 24 hour period per the State Statute. The amount of one dollar was not deposited as required.

Cause: The Department lacked inadequate internal controls to ensure that all cash received in a given day was deposited within the required timeframe.

Effect: Noncompliance with New Mexico state statutes.

Auditor's Recommendations: We recommend the Department establish procedures to ensure compliance with the applicable statutes.

Management's Response: Management concurs with the finding as stated and has immediately started an implementation plan to ensure that all cash receipts are reconciled to the deposit slips, by implementing a process that all deposits made by any employee must verify that the Cash Receipt Report (CRR) and the deposit slip processed by the bank reconciliation. The employee making the deposit must initial the Cash Receipt Report and the Deposit Slip indicating that they have verified that both the Cash Receipt Report and the Deposit Slip reconcile prior to mailing the report and deposit slip to ASD office. Upon receipt of the Cash Receipt Report and Deposit slips by ASD, the Financial Coordinator assigned to process all cash receipts will reconcile all Cash Receipt Reports to the corresponding deposits slips and ensure that all signatures and initials are present. If a Cash Receipt Report and corresponding deposit slip do not reconcile the Financial Coordinator will send an email to the prepare of the Cash Receipt Report and copy their manager and director of the division to have them reconcile and provide a justification as to why the reconciliation was not completed and have a response back within 24 hours.

State of New Mexico Energy, Mineral, and Natural Resources Department Corrective Action Plan For the Year Ended June 30, 2018

	Management's Corrective Action Plan	Employee Person Responsible	Timeline and Estimated Completion Date
2016-001 Use of State Issued Gas Cards	 Management will complete the following as a corrective action plan: Revised internal policy to ensure compliance with all new standardized forms and required information. Standardize the vehicle use log to include all relevant information necessary to track the use of each vehicle. Each vehicle use log will have a bolded statement noting that only regular unleaded use only unless valid justification of other fuel use is necessary. If not, a valid justification must be submitted, and disciplinary action can be taken on the drive. All receipts must be attached to the log. If no receipt obtained or lost/illegible receipt, a justification must be stated on the standardized vehicle log by the driver. Each vehicle log will require a signature by the fleet coordinator acknowledging all logs are filled out correctly and all receipts are attached and a second signature by the division indicating that logs have been reconciled to WEX invoice prior to being submitted to ASD monthly. All vehicle logs must be scanned to the corresponding WEX invoice in SHARE 	CPO, CFO	1/1/2019

State of New Mexico Energy, Mineral, and Natural Resources Department

Corrective Action Plan For the Year Ended June 30, 2018

	Management's Corrective Action Plan	Employee Person Responsible	Timeline and Estimated Completion Date
2018-001 Cash Receipts and Deposits	Management will complete the following as a corrective action plan: 1) Revised internal policy to include the requirement that all bank deposit slips be initialed by the employee making the deposit ensuring that the Cash Receipt Report and the deposit with the bank reconcile. 2) Upon making any cash deposit with any bank, the employee making the deposit must verify that the posted deposit slip by the bank reconciles to the Cash Receipt Report and initial the deposit slip total indicating that they have validated the amount with the Cash Receipt Report, prior to mailing the information to ASD. 3) Upon receipt of the Cash receipt Report and corresponding deposits slips, the ASD Financial Coordinator will reconcile all Cash Receipt Reports with the deposit slips and ensure that all signatures and initial are present. 4) If a Cash Receipt Report and corresponding deposit slip do not reconcile, the Financial Coordinator will email the preparer of the Cash Receipt Report and corresponding deposit slip do not reconcile, the Financial Coordinator will email the preparer of the Cash Receipt Report and copy their manager		•
	and division director requesting that they reconcile and submit a justification of why it was not done within 24 hours of the email.		

State of New Mexico Energy, Mineral, and Natural Resources Department Exit Conference June 30, 2018

An exit conference was held with the Department on October 23, 2018. The conference was held at the Department's offices in Santa Fe, New Mexico. The conference was held in a closed meeting to preserve the confidentiality of the audit information prior to the release of the financial statements by the State Auditor. In attendance were:

State of New Mexico Energy, Minerals, and Natural Resources Department

Ken McQueen, Acting Cabinet Secretary

Matthew Lovato, Acting Administrative Services Division Director/Chief Financial Officer

REDWLLC

Tom Friend, CPA Principal Javier Machuca, CPA, CGFM, CGMA Senior Manager Daniela Moya, CPA, Senior Auditor

Preparation of Financial Statements

The financial statements presented in this report have been prepared by the independent auditor. However, they are the responsibility of management, as addressed in the Independent Auditor's Report.
