

PUBLIC NOTICE
IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Rock Hound State Park Failed to Submit Corrective Action Within Required Time Frame

Este informe contiene información importante acerca de su agua potable. Haga que alguien lo traduzca para usted, o hable con alguien que lo entienda

Our water system recently violated a drinking water requirement. Although this incident was not an emergency, as our customers, you have a right to know what happened and **what we are doing** to correct this situation.

A routine sanitary survey conducted on September 18, 2025, by the New Mexico Environment Department-Water Protection Compliance & Enforcement Bureau (NMED WPCEB) found:

1. Major modifications not approved
2. No operation and maintenance plan (OMP)
3. No water system map
4. Well #2 lacks sanitary seal
5. Well #2 has no well casing vent
6. Storage Tank #2 overflow not extended or screened
7. Storage Tank #2 hatch is not locked
8. Storage Tank #2 has no air vent
9. Well #2 decommissioned filter housing leaks
10. Pressure Tank #1 isolation valve leaks
11. Pressure Tank #1 housing unit has bird and rodent infestation

We were to consult with the NMED-WPCEB regarding the appropriate corrective actions within 30 days as required by Environmental Protection Agency's (EPA's) Ground Water Rule. However, we failed to take these actions by the deadlines established by the NMED WPCEB.

What should I do?

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. However, if you have specific health concerns, consult your doctor.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

What does this mean?

This is not an emergency. If it had been, you would have been notified within 24 hours.

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may want to seek medical advice.

What is being done? #1 NMED approved Modifications 20Dec24; #2 OMP being drafted; #3 NMED approved map 10Jun26; #4/#5 completed Jun26; #6-#8 work to be completed Jul26, #9 completed Jun26; #10-#11 work to be completed Jul26
