I am sure other people have noticed, but I don't know if anyone has made a comment about this..

I noticed the last few years there are a few companies that are pumping waste out of Rvs that are parked on the beach for weeks, and they are bringing water to Rvs also. I noticed they are filling their water trucks up at the water spouts on state parks land.. are they paying for the water? I know they are also dumping the waste water into the dump stations on the state parks land. I know they are charging people for their services, but are they paying the state parks department fees? Please look into this before you raise our fees.

Also Texas takes a lot of our water, if we need to go up on fees let's charge NON-New Mexico residents more than New Mexico residents. We live here, we pay all of our taxes here, Texians don't make them pay more.

Thank you

Jessica Hadder
