ANOMALY / NCR SUMMARY:
 Samples CVR3TR2-3-TWIN-SOL, CVR3TR3-1-TWIN-SOL, and CVR3TR3-2-TWIN-TLG used in work at 2.0°C, all other values for this log used in work at 14.2°C, per client's request.
 Label for CVR3TR3-1-TWIN-TLG lists temp of 16.25, signed 11/30/09-COC.
 Sample label for CVR3TR3-1-TWIN-SOL, for 13.00, list, is COC used 14.2°C.
 Sample label for CVR3TR2-3-TWIN-SOL reads CVR3TR2-3-TWIN-TLG, Sample label for 70.0-COC.
 Sample label for CVR3TR2-3-TWIN-SOL lists temp of 0.15, list reads 14.15, signed 11/30/09-COC.
 COC leaves off 14.2°C in 70.0 of CVR3TR3-2-TWIN-SOL, reads CVR3TR3-2-TWIN-SOL once, IAF on label used 14.2°C.

Re: Laboratory Project No. 29000
Case: CMI; SDG: 137170

Dear Ms. O'Conner:

Enclosed are the analytical results for the samples that were received by TestAmerica Burlington on May 4th, 2010. Laboratory identification numbers were assigned, and designated as follows:

| <u>Lab ID</u> | <u>Client Sample ID</u> | <u>Sample Date</u> | <u>Sample Matrix</u> |
|-----------------------------------|-----------------------------|------------------------|--------------------------|
| Received: 05/04/10 ETR No: 137170 | | | |
| 828897 | CVR2TR1-1-T04N-SOL | 05/01/10 | SOIL |
| 828897DP | CVR2TR1-1-T04N-SOLREP | 05/01/10 | SOIL |
| 828897MD | CVR2TR1-1-T04N-SOLMSD | 05/01/10 | SOIL |
| 828898 | CVR2TR3-2-T01N-SOL | 04/28/10 | SOIL |
| 828899 | CVR2TR3-2-T01N-TLG | 04/28/10 | SOIL |
| 828900 | CVR2TR3-2-T02N-SOL | 04/28/10 | SOIL |
| 828901 | CVR2TR3-2-T04N-SOL | 04/28/10 | SOIL |
| 828902 | CVR2TR3-3-T01N-SOL | 04/28/10 | SOIL |
| 828903 | CVR2TR3-3-T01N-TLG | 04/28/10 | SOIL |
| 828904 | CVR2TR3-3-T02N-SOL | 04/29/10 | SOIL |
| 828905 | BA5-T01N-SOL | 04/28/10 | SOIL |
| 828906 | BA6-T01N-SOL | 04/28/10 | SOIL |
| 828907 | CVR3TR3-3-T04N-SOL | 04/29/10 | SOIL |

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B

There were no exceptions to the method quality control criteria during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.)

The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph Carabillo", written in a cursive style.

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

| | | | | | | |
| | | | | | | |

Calculation: Percent Wet Weight = $\frac{\text{Weight of Dry Sample (g)}}{\text{Weight of Wet Sample (g)}} \times 100$

Where:

Weight of Dry Sample = (Weight of Dish + Dry Sample) (g) - Dish Weight (g)

Weight of Wet Sample = (Weight of Dish + Wet Sample) (g) - Dish Weight (g)

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B

Due to insufficient sample volume, the laboratory was unable to perform a matrix spike and matrix spike duplicate analysis. All data is reported to the instrument detection limit.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph Carabillo", written in a cursive style.

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

TestAmerica Laboratories, Inc.

May 20, 2010

Ms. Sheri O'Conner
URS Operating Services, Inc.
1099 18th Street
Suite 710
Denver, CO 80202

Re: Laboratory Project No. 29000
Case: ; SDG: 137201

Dear Ms. O'Conner:

Enclosed are the analytical results for the samples that were received by TestAmerica Burlington on May 4th, 2010. Laboratory identification numbers were assigned, and designated as follows:

| <u>Lab ID</u> | <u>Client Sample ID</u> | <u>Sample Date</u> | <u>Sample Matrix</u> |
|-----------------------------------|-----------------------------|------------------------|--------------------------|
| Received: 05/04/10 ETR No: 137201 | | | |

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B

These tissue samples were homogenized prior to extraction as per internal laboratory procedure. There were no quality control issues encountered during the analysis of the samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Method Codes:

- P ICP-AES
MS ICP-MS
CV Cold Vapor AA
AS Semi-Automated Spectrophotometric

ANOMALY / NCR SUMMARY:

All values for this log in received in 2 of 6 cooler at 2.2°C and 4.3°C, copies of airbills attached.

Revised 2 vials labeled as CVR ITR2-3-T02N-PLTGAW, one of the vials should be labeled as CVR ITR2-3-T02D-PLTGAW, one of the labels is hand written and will be labeled as CVR ITR2-3-T02D-PLTGAW. Also 2 vials for CVR ITR2-3-T02N-PLTGAW had the label legible as CVR ITR2-3-T02D-PLTGAW. 30s w/QC samples truncated for length due to length, all plus removed.

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B: Plant Tissue

These sample volumes were homogenized prior to analysis via 6010B. The relative percent difference (RPD) for sample CVR1TR32T03NFLTFBWD was outside the established quality control criteria. Please refer to report for details.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

SPECIAL INSTRUCTIONS/COMMENTS
Inorganic suite includes:

Matrix Key:
W = Water
S = Soil/Sediment
B = Biota
O = Other veg.

Container Key:
P = Plastic
G = Glass
C = Clear
A = Amber
V = Vial
Z = Ziploc bag
M = Multiple types

Calculation: Percent Wet Weight =
$$\frac{\text{Weight of Dry Sample (g)}}{\text{Weight of Wet Sample (g)}} \times 100$$

Where:

Weight of Dry Sample = (Weight of Dish + Dry Sample) (g) - Dish Weight (g)

Weight of Wet Sample = (Weight of Dish + Wet Sample) (g) - Dish Weight (g)

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B: Plant Tissue

These sample volumes were homogenized prior to analysis via 6010B. There were no QC related anomalies encountered during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Carabillo', is written over a light blue horizontal line.

Joseph Carabillo

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Calculation: Percent Wet Weight = $\frac{\text{Weight of Dry Sample (g)}}{\text{Weight of Wet Sample (g)}} \times 100$

Where:

Weight of Dry Sample = (Weight of Dish + Dry Sample) (g) - Dish Weight (g)

Weight of Wet Sample = (Weight of Dish + Wet Sample) (g) - Dish Weight (g)

Sample Report Summary – Metals

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B Tissue

These sample volumes were homogenized prior to analysis via 6010B. There were no QC related anomalies encountered during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Carabillo', is written over a light blue horizontal line.

Joseph Carabillo

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Calculation: Percent Wet Weight =
$$\frac{\text{Weight of Dry Sample (g)}}{\text{Weight of Wet Sample (g)}} \times 100$$

Where:

Weight of Dry Sample = (Weight of Dish + Dry Sample) (g) - Dish Weight (g)

Weight of Wet Sample = (Weight of Dish + Wet Sample) (g) - Dish Weight (g)

Unless otherwise documented, the recorded temperature readings are adjusted readings to account for the CF of the IR Gun
 EPA Criteria: 0-6°C, except for air and geo samples which should be at ambient temperature and tissue samples, which may be frozen.
 Some clients require thermal preservation criteria of 2-4°C or other such criteria. The PM must notify SM when alternate criteria is specified.

Re: Laboratory Project No. 29000
Case: CMI; SDG: 137213

Dear Ms. O'Conner:

Enclosed are the analytical results for the samples that were received by TestAmerica Burlington on May 4th, 2010. Laboratory identification numbers were assigned, and designated as follows:

| <u>Lab ID</u> | <u>Client Sample ID</u> | <u>Sample Date</u> | <u>Sample Matrix</u> |
|-----------------------------------|-----------------------------|------------------------|--------------------------|
| Received: 05/04/10 ETR No: 137213 | | | |

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B: Tissue

The tissue samples were homogenized prior to analysis via 6010B. There were no method related quality control anomalies noted during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Carabillo', is written over a light blue horizontal line.

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Method Codes:

- P ICP-AES
MS ICP-MS
CV Cold Vapor AA
AS Semi-Automated Spectrophotometric

Unless otherwise documented, the recorded temperature readings are adjusted readings to account for the CF of the IR Gun
 EPA Criteria: 0-6°C, except for air and geo samples which should be at ambient temperature and tissue samples, which may be frozen.
 Some clients require thermal preservation criteria of 2-4°C or other such criteria. The PM must notify SM when alternate criteria is specified.

Re: Laboratory Project No. 29000
Case: CMI; SDG: 137214

Dear Mr. O'Conner:

Enclosed are the analytical results for the samples that were received by TestAmerica Burlington on May 4th, 2010. Laboratory identification numbers were assigned, and designated as follows:

| <u>Lab ID</u> | <u>Client Sample ID</u> | <u>Sample Date</u> | <u>Sample Matrix</u> |
|-----------------------------------|-----------------------------|------------------------|--------------------------|
| Received: 05/04/10 ETR No: 137214 | | | |
| 829330 | CVR3TR12T02NPLTGBW | 05/02/10 | TISSUE |
| 829330DP | CVR3TR12T02NPLTGBWREP | 05/02/10 | TISSUE |
| 829330MD | CVR3TR12T02NPLTGBWMSD | 05/02/10 | TISSUE |
| 829331 | CVR2TR3-3-T02N-PLTGBW | 04/29/10 | TISSUE |
| 829332 | CVR3TR3-3-T04N-PLTSAW | 04/29/10 | TISSUE |
| 829333 | CVR3TR3-3-T04N-PLTSBW | 04/29/10 | TISSUE |
| 829334 | EQBLK01 | | TISSUE |

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B: Plant Tissue

These sample volumes were homogenized prior to analysis via 6010B. There were no QC related anomalies encountered during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read "Joseph Carabillo", written in a cursive style.

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Denver, CO 80202

Re: Laboratory Project No. 29000
Case: CMIS&V; SDG: 137254

Dear Ms. O'Conner:

Enclosed are the analytical results for the samples that were received by TestAmerica Burlington on May 5th, 2010. Laboratory identification numbers were assigned, and designated as follows:

| <u>Lab ID</u> | <u>Client Sample ID</u> | <u>Sample Date</u> | <u>Sample Matrix</u> |
|-----------------------------------|-----------------------------|------------------------|--------------------------|
| Received: 05/05/10 ETR No: 137254 | | | |
| 829620 | BA1-T01N-SOL | 04/28/10 | SOIL |
| 829621 | BA2-T01N-SOL | 04/28/10 | SOIL |
| 829622 | BA3-T01N-SOL | 04/28/10 | SOIL |
| 829623 | BA4-T01N-SOL | 04/28/10 | SOIL |

Documentation of the condition of the samples at the time of their receipt and any exception to the laboratory's Sample Acceptance Policy is documented in the Sample Handling section of this submittal.

Total Molybdenum by SW-846 6010B

There were no exceptions to the method quality control criteria encountered during the analysis of these samples.

Any reference within this report to Severn Trent Laboratories, Inc. or STL, should be understood to refer to TestAmerica Laboratories, Inc. (formerly known as Severn Trent Laboratories, Inc.) The analytical results associated with the samples presented in this test report were generated under a quality system that adheres to requirements specified in the NELAC standard. Release of the data in this test report and any associated electronic deliverables is authorized by the Laboratory Director's designee as verified by the following signature.

If there are any questions regarding this submittal, please contact me at 802 660-1990.

Sincerely,

A handwritten signature in black ink, appearing to read 'Joseph Carabillo', is written over a light gray rectangular background.

Joseph Carabillo
Project Manager

TestAmerica Burlington Data Qualifier Definitions

Organic

- U: Compound analyzed but not detected at a concentration above the reporting limit.
- J: Estimated value.
- N: Indicates presumptive evidence of a compound. This flag is used only for tentatively identified compounds (TICs) where the identification of a compound is based on a mass spectral library search.
- P: SW-846: The relative percent difference for detected concentrations between two GC columns is greater than 40%. Unless otherwise specified the higher of the two values is reported on the Form I.
- CLP SOW: Greater than 25% difference for detected concentrations between two GC columns. Unless otherwise specified the lower of the two values is reported on the Form I.
- C: Pesticide result whose identification has been confirmed by GC/MS.
- B: Analyte is found in the sample and the associated method blank. The flag is used for tentatively identified compounds as well as positively identified compounds.
- E: Compounds whose concentrations exceed the upper limit of the calibration range of the instrument for that specific analysis.
- D: Concentrations identified from analysis of the sample at a secondary dilution.
- A: Tentatively identified compound is a suspected aldol condensation product.
- X,Y,Z: Laboratory defined flags that may be used alone or combined, as needed. If used, the description of the flag is defined in the project narrative.

Inorganic/Metals

- E: Reported value is estimated due to the presence of interference.
- N: Matrix spike sample recovery is not within control limits.
- * Duplicate sample analysis is not within control limits.
- B: The result reported is less than the reporting limit but greater than the instrument detection limit.
- U: Analyte was analyzed for but not detected above the reporting limit.

Particle Size Results

Particle Size of Soils by ASTM D422_MOD

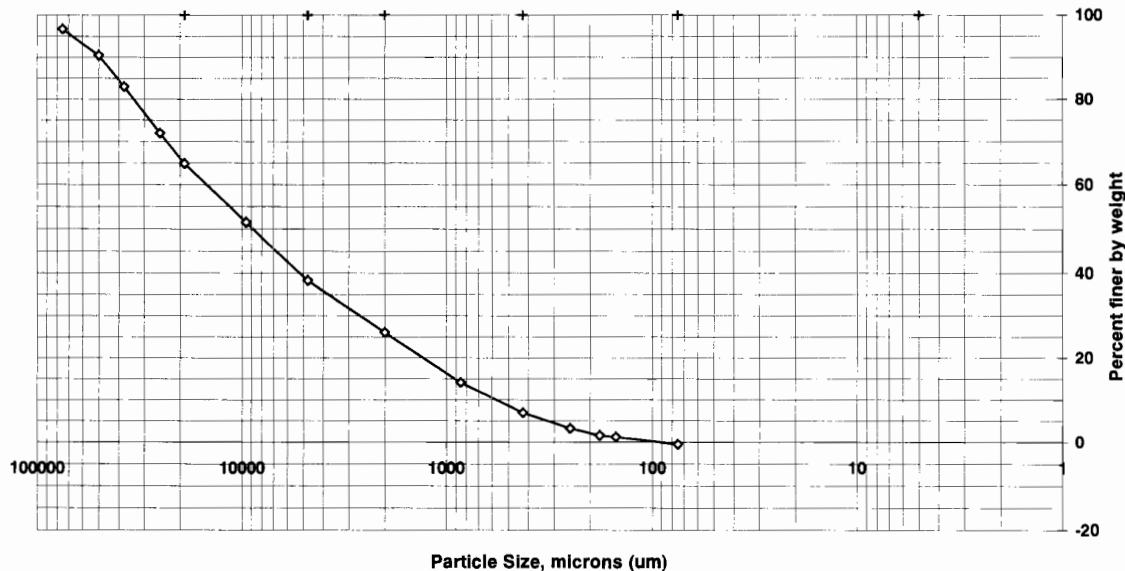

Client Code: URSCOD
 Sample ID: BA1-T01N-SOL
 Lab ID: 829620

SDG: 137254
 ETR(s): 137254

Date Received: 5/5/2010
 Start Date: 5/7/2010
 End Date: 5/12/2010

Percent Solids: 100.0%
 Specific Gravity: 2.650
 Maximum Particle Size: 75 mm

Non-soil material: na
 Shape (> #10): subrounded
 Hardness (> #10): hard

| Sieve size | Particle size, um | Percent finer | Incremental percent |
|------------|-------------------|---------------|---------------------|
| 3 inch | 75000 | 96.7 | 3.3 |
| 2 inch | 50000 | 90.5 | 6.2 |
| 1.5 inch | 37500 | 83.0 | 7.5 |
| 1 inch | 25000 | 71.9 | 11.1 |
| 3/4 inch | 19000 | 64.8 | 7.1 |
| 3/8 inch | 9500 | 51.5 | 13.4 |

ANALYTICAL SUMMARY REPORT

May 28, 2010

Sheri O'Conner
URS Corporation
8181 E Tufts Ave
Denver, CO 80237

Workorder No.: B10051307

Quote ID: B2164

Project Name: CMI

Energy Laboratories Inc received the following 4 samples for URS Corporation on 5/18/2010 for analysis.

| Sample ID | Client Sample ID | Collect Date | Receive Date | Matrix | Test |
|---------------|------------------|---------------|--------------|--------|---|
| B10051307-001 | BA1-TOIN-SOL | 04/28/10 9:00 | 05/18/10 | Soil | DPTA extractable metals Metals, NH4OAc Extractable Metals, Ammonium Oxalate Extractable Cations, Saturated Paste Conductivity Nitrate as N, KCL Extract pH, Saturated Paste Phosphorus-Olsen DTPA extraction for metals NH4AC Soil Extraction Ammonium Oxalate Soil Extraction Saturated Paste Extraction Particle Size Analysis Sodium Adsorption Ratio Texture |
| B10051307-002 | BA2-TOIN-SOL | 04/28/10 9:10 | 05/18/10 | Soil | Same As Above |
| B10051307-003 | BA3-TOIN-SOL | 04/28/10 9:20 | 05/18/10 | Soil | Same As Above |
| B10051307-004 | BA4-TOIN-SOL | 04/28/10 9:35 | 05/18/10 | Soil | Same As Above |

Any exceptions or problems with the analyses are noted in the Laboratory Analytical Report, the QA/QC Summary Report, or the Case Narrative.

The results as reported relate only to the item(s) submitted for testing.

If you have any questions regarding these test results, please call.

Comments:

To assure that the quoted analysis and pricing specifications are provided, please include the Quote ID number referenced above on the Chain of Custody or sample submittal documents.

* Methods and/or parameters included in the indicated test group.
Subcontracting of sample analyses to an outside laboratory may be required. If so, Energy Laboratories will utilize its branch laboratories or qualified contract laboratories for this service. Any such laboratories will be indicated within the Laboratory Analytical Report.
