**WELDED WIRE GATE DETAILS**

- Gate Frame: 1.66” OD Galv Steel Pipe (1.83 Lbs./ft.) PVC-Coated, Cap Top
- Gate Posts: 2 Strands PVC-Coated Barbed Wire
- Gate Panel: Prefabricated Metal Panel
- Gate Lock: Welded Wire Fence Details
- Gate Opener: 4-2” Clear
- Gate Frame: 1.66” OD Galv Steel Pipe (1.83 Lbs./ft.) PVC-Coated, Cap Top

**GENERAL NOTES:**

1. Use clamps provided by the manufacturer to attach metal posts to panels and braces. Install brace panels according to manufacturer's instructions. Prefabricated panels and braces shall be easy fence by D.O. Inspectors or equivalent.
2. Run fence in straight lines between end and corner posts, avoid acute angles (less than 60°) at fence corners.
3. Bore holes 3/8”dia. into holes 1/2”dia. in top bar of any other metal pipe in position of the post. Drill holes to a depth of at least three times the hole diameter.
4. Gate location shall be determined by the Project Manager.
5. All galvanized metal shall be painted with Natina Steel, by Natina Products (www.natina.com) or an approved equivalent. Application rate shall be as directed by the manufacturer.
6. Gate lock shall be 4-2” Clear PVC-Coated or Approved Equivalent (Available from Hoover Fence Co.) as shown in gate lock 119904PULS, 1-800-396-2333, www.hooverfence.com.
7. The project manager shall determine the layout of the fence and proximity to the mine openings, as a general rule, the fence be offset from opening by three to four feet.
