New Mexico State Parks Division

Conchas Lake State Park

Birds of Conchas

This large lake located on the high plains features secluded coves, pink rock canyons, and sandy beaches. The lake, fed by the Canadian River, is a good area in winter to look for deep water species such as loons, grebes and a large variety of waterfowl. The graceful concrete dam was built in the Depression-era 1930s.

This checklist provides information on birds you are likely to encounter at Conchas Lake State Park. The checklist has been compiled using data from eBird. Birders are encouraged to log their sightings at eBird.org to help improve the list in the future. The list for Conchas Lake includes 255 species.

Key		B Sp S F W
	Breeding status	Spring Winter
Dradina		Summer Fall

Breeding

- B Breeding status
- + Breeds in San Miguel County, New Mexico.

Seasons

- Sp Spring (March 1–May 31)
- S Summer (June 1-August 31)
- F Fall (September 1–November 30)
- W Winter (December-February 28)

Abundance

- c Common. Present in the proper habitat and season.
- fc Frequently common. Often present in the proper habitat and season.
- u Uncommon. Occasionally present in the proper habitat and season.
- r Rare. Seldom present in suitable habitat; few records.
